NHTSA RECALL 18V-915

Dear Nissan Altima owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety, exists in certain Model Year 2015-2017 Nissan Altima vehicles. Our records indicate you own or lease a Nissan vehicle subject to this recall as identified by the Vehicle Identification Number (VIN) on the inside of this notice.

Reason for Recall

Although your vehicle was previously repaired under Recall 17V-040, the latch-lock cable may not have been routed properly in the rear door when the repair was made. As a result, the cable may interfere with the window regulator which could cause the rear passenger door to unlatch and inadvertently open without warning when the window is lowered. If this occurs while the vehicle is in motion, it could increase the risk of injury to the rear passengers.

What Nissan Will Do

Your Nissan dealer will use the revised repair procedure to properly route and secure the door latch-lock cable to prevent interference with the window regulator. This repair should take less than one (1) hour to complete and will be free of charge. However, if additional parts are required to complete the repair, the repair can take up to one (1) hour. Your dealer may require your vehicle for a longer period of time based upon their work schedule.

What You Should Do
