

**TECHNICAL INSTRUCTIONS**  
**FOR**  
**SAFETY RECALL JLI/JLJ/JLK**  
**FRONT PASSENGER AIRBAG INFLATOR REPLACEMENT**  
**CERTAIN 2006 – 2012 MY IS 250/350 and 2008 – 2009 MY IS F**

The repair quality of covered vehicles is extremely important to Lexus. All dealership technicians performing this recall are required to successfully complete the most current version of the E-Learning course “Safety Recall and Service Campaign Essentials”. To ensure that all vehicles have the repair performed correctly:

- **MASTER SERVICE TECHNICIANS**
- **MASTER DIAGNOSTIC SPECIALISTS**

It is the dealership’s responsibility to select technicians with the above certification level or greater to perform this recall repair. Carefully review your resources, the technician skill level, and ability before assigning technicians to this repair. It is important to consider technician days off and vacation schedules to ensure there are properly trained technicians available to perform this repair at all times.

**NOTE:** To support additional service capacity, Lexus Certified and Senior Service Technicians, with at least 36 months Lexus experience AND L652 course credit, may also perform this repair following successful completion of course LSC13B.

## I. OPERATION FLOW CHART

The flow chart is for reference only. **DO NOT** use it in place of the full technical instructions. Follow **ALL** steps as outlined in the full technical instructions to confirm the campaign is completed correctly.

## II. BACKGROUND

The subject vehicles are equipped with front passenger airbag inflators produced by Takata. The propellant in these inflators may degrade after prolonged exposure to high absolute humidity and fluctuating high temperatures. Degraded propellant can cause inflator rupture during airbag deployment. In the event of an inflator rupture, metal fragments could pass through the airbag cushion material, striking the vehicle occupants, and result in serious injury or death.

### III. IDENTIFICATION OF AFFECTED VEHICLES

#### A. COVERED VIN RANGE

- Check the TIS Vehicle Inquiry System to confirm the VIN is involved in this Safety Recall, and that the campaign has not already been completed prior to dealer shipment or by another dealer.
- **TMS warranty will not reimburse dealers for repairs conducted on vehicles that are not affected or were completed by another dealer.**

### IV. PREPARATION

#### A. PARTS

Part Number	Part Description	Quantity
04007-06353	Instrument Panel Passenger Airbag Inflator Kit*	1
*The kit above includes the following parts.		
Part Number	Part Description	Quantity
-	Inflator	1
-	Self-locking Nut	5
-	Position Determining Plate	1
04006-66108*	Front Pillar Garnish Kit	1

\*The kit contains 2 clips

#### Non-Desiccated Part Recovery

**Dealers should *discontinue the installation of the non-desiccated parts listed below for recall, customer pay repairs AND over-the-counter sales (if applicable).***

Model	Model Year	Part Number	Part Description
IS 250 – IS 350, IS-F and IS 250C – IS350C	2006-2014	73960-53020 73960-53060	AIR BAG ASSY, INSTR PNL PASS L/DOOR

**Lexus requires all dealers to return any parts listed above that still remain in dealer inventory by utilizing the Hazmat Part Return Program available. Dealers will be issued a refund for all part returns. This part return program is outlined in *PANT Bulletin 2014-042*.**

#### Important Note:

In order to return the inflator, packages must **NOT** be opened/tampered with.

**B. TOOLS & EQUIPMENT**

- Standard hand tools
- Torque wrench
- Techstream
- Molding remover set

**GLG/GLH/HLA CAMPAIGN TOOLS** – These tools were previously provided to the dealership for campaign DLC and will be used for campaign ELG. These tools are required when performing this repair.

Image	Name	Quantity
	Barcode Scanner	1

**NOTE:** This tool **CANNOT** be ordered through the parts or tools system. There is a very limited supply of tools, but if additional tools are needed, contact your area representative.

**DLC CAMPAIGN TOOLS** – These tools are required when performing this repair.

Image	Name	Quantity
	Airbag Mounting Bracket & hardware (Provided to the dealership at the launch of SSC DLC)	1
	579943 Adaptor set*	1

\*The adaptor set was sent to dealers prior to the start of this campaign.

**SST** –These are essential service tools that the dealership should have.

Part Number	Part Name	Quantity
09950-50013	Puller C Set *	1
* The set above includes the following tools.		
Part Number	Part Name	Quantity
09951-05010	Hanger 150	1
09952-05010	Slide Arm	2
09953-05020	Center Bolt 150	1
09954-05021	Claw No. 2	2

## V. SAFETY PRECAUTIONS

### CRITICAL INFORMATION – READ THOROUGHLY

Failure to follow these procedures correctly could cause the SRS to unexpectedly deploy during servicing or the SRS may fail to operate correctly when required after reassembly. Confirm all work is performed as described in these instructions.

#### 1. ELIMINATE STATIC ELECTRICITY

- a) Before starting work and periodically while working on the vehicle, touch a metallic part of the vehicle to discharge static electricity in the body.

**NG** DO NOT measure resistance.

#### 2. DO NOT MEASURE RESISTANCE

- a) **DO NOT** measure resistance of airbag components, this may cause accidental activation.

**NG** Replace with new one.

#### 3. HANDLE THE AIRBAG CAREFULLY

- a) If an inflator is dropped, replace it with a **NEW** inflator.

Wear protective eye wear and work gloves.

#### 4. WEAR PROTECTIVE EQUIPMENT

- a) Always wear appropriate protective equipment when working on the SRS.

## 1. DISCONNECT THE NEGATIVE BATTERY TERMINAL

- Wait at least 90 seconds after disconnecting the cable from the negative battery terminal to prevent airbag and seat belt pre-tensioner deployment.
- Follow all precautions as outlined on TIS before servicing the SRS system.

## 2. INSTRUMENT PANEL PRECAUTIONS AND REMOVAL

Prior to dash removal make note of the following precautions. Over time some dash components could be easily damaged if not carefully removed.

Removing the No. 3 air register

Remove any peripheral parts on left and right side of the register to allow access to the back of the register.

Wrap the tip of a screwdriver with tape.

Lock the 4 claws inside the register as shown.

**NOTE: Do not use a molding removal tool to remove the register it could be damaged.**

**NG** Do not use a molding remover

R1606160001F01

**NG** Do not push connector or wire harness

R1606100015F01

**NOTE: When removing the register DO NOT push on the connector or wiring as it could be damaged.**

You will remove the register by pushing from the back.

**【Example for removal of center register】**

**OK** Push from the back side

**NG** Pry from the front side

R1606130005F01

Using your finger on the left side push out at the point shown to disengage the 4 claws.

Back side of part manufactured before August 2008:

Back side of the part manufactured after August 2008:

○ : Claw

R1606100013F01

Using your finger on the right side push out at the point shown to disengage the 3 claws and remove the register from the instrument panel.

**NOTE: DO NOT** contact the positioning tabs while removing the instrument panel as the panel could be damaged.

a) Refer to TIS for removal instructions

IS 250/350	<a href="#">2006 MY</a>	<a href="#">2007 MY</a>	<a href="#">2008 MY</a>	<a href="#">2009 MY</a>	<a href="#">2010 MY</a>	<a href="#">2011 MY</a>	<a href="#">2012 MY</a>
IS F	<a href="#">2008 MY</a>	<a href="#">2009 MY</a>					

### 3. REMOVE THE AIRBAG FROM THE DASH

- a) Remove the 3 screws and the side defroster nozzle.
- b) Remove the 2 screws and the heater to register duct.

- c) Remove the 4 bolts, disengage the straps, and then remove the airbag assembly.

**NOTE: Use a screwdriver with the tip wrapped in tape to remove the airbag from the dash.**

- d) Using a screwdriver to release the lock button of the connector.
  - e) Disconnect the 2 connectors.
  - f) Disengage the 2 clamps.
- NOTE: The removed instrument panel wire will not be reused.**

**1. REMOVE THE INFLATOR**

- a) Mark the 5 self locking nuts to prevent reuse.

b) Mount the adaptors (579943-3R3) to the airbag as shown.

**NOTE: The 6mm stud mounts to the airbag.**

c) Mount the airbag to the mounting bracket as shown.

d) Loosen the 5 nuts until each nut is flush with the top of the stud as shown.

**NOTE: You may need to slide the airbag to the left or right to access the middle nut. DO NOT use power tools to remove the nuts.**

R1701190003

- e) Loosen and discard the 2 nuts on the end where the positioning plate is removeable.
- f) Remove and discard the plate.

**NOTE:**  
**DO NOT use power tools.**

- g) Remove the inflator.

- h) Mark the old inflator so it is not reused.
- NOTE: Return the old inflator to the parts department for recovery.**

## VIII. AIRBAG RECORDING

### 1. LAUNCH THE SERIAL NUMBER RECORDING APPLICATION

Note: The Serial Number Recording Application is the same application used for DLC.

- The AIRBAG ASSEMBLY serial numbers **MUST** be recorded using a barcode scanner (provided at the launch of SSC DLC).
- The barcode scanner application **MUST** be completed on every vehicle. These numbers **MUST** be included on every warranty claim that is submitted for airbag module replacement or the claim may be subject to debit.
- The technician performing the work **MUST** have valid TIS login credentials and an internet connection to perform the inspection and scanning process.

- Log in to TIS and input the VIN of the vehicle in the Vehicle Inquiry tab.
- Confirm the VIN is applicable and that the campaign has not been completed.
- Click on the link to launch the serial number recording application.

The screenshot shows the Toyota TIS Vehicle Inquiry application. At the top, there are navigation tabs: Home, TIS, TAS, PRS, QAT. Below that, there are sub-tabs: Library, Diagnostics, Tech Assistance, and Vehicle Inquiry. The main content area is titled 'Vehicle Identification Number Search' and contains a form with the VIN '1NX BR32E 000000000' entered. A red circle highlights the VIN input field, labeled 'a)'. Below the search form is the 'Vehicle Information' section, which displays details such as Division (TOYOTA), Model (Corolla), Grade (CE), Model Year (2003), Drive Type (2WD), Body Type (4Dr. Sedan), Engine Family (4-cylinder - 1ZZ), Transmission, Date of First Use, Production Date (01/18/2002), Plant Code (Z - FREMONT PLANT - NUMMI), VIN (1NX -BR32E-000000000), Standard Equipment (Click here to display), Exterior Color (03M5, SANDRIFT METALLIC), Interior Color (FA41, FA41), Interior Trim Color (FA, \*), and Interior Fabric (F, \*). Below this is the 'Service Campaign' section, which shows a campaign description: 'Safety Recall D0F Remedy Notice - 2003-2004 Model Year Corolla, Corolla Matrix, Sequoia, and Tundra Vehicles, 2002-2003 Model Year Vehicles Front Passenger Airbag Inflation Module'. The completion status is 'Not Completed', and there is a link 'Check applicability for VIN' circled in red, labeled 'b)'. Below the link is another red circle labeled 'c)'. At the bottom of the page, there is a copyright notice for 2013 Toyota Motor Sales, Inc. and links for Feedback, Privacy, and Legal.

- Reenter TIS password in the serial number recording application.

**NOTE: The person logged-in to TIS MUST be the person performing the repair.**

The screenshot shows the 'Front Passenger Airbag Inflator Module - Safety Recall SSC - DSF' application. It displays user information: User ID (SuzukiR), Dealer Code, Time (06/10/2014 02:07 PM PDT), Original Inflator Serial #, Technician Name (Russell Suzuki), Dealer Name, Airbag Serial #, and Replacement Inflator Serial #. The VIN is '1NX BR32E 000000000' and the Mileage is '0'. A red circle highlights the Mileage input field. Below the form is a table with columns: Task, Dealer, User, Time, Status. The table contains the following rows:

Task	Dealer	User	Time	Status
Inflator # Record				Not Started
Inflator # Record				Not Started
Terms & Conditions				Not Started
New Airbag #				Not Started

- Record the vehicle mileage into the serial number recording application.

**NOTE:**

- A task status screen will populate next and at other intervals during the repair. This screen will indicate if the inflator was replaced or in some limited cases that the entire airbag assembly was replaced. Click 'next' to proceed to the next step. This information will be used for record keeping by TMS.
- If this screen indicates that the campaign has already been completed on this VIN, there is no need to perform the campaign again.

## 2. CONNECT THE BARCODE SCANNER

- Connect the barcode scanner to the USB port on the Techstream.
- The scanner will automatically connect and a beep will be heard when the scanner is ready.

### NOTE:

- The scanner was provided for SSC DLC.
- The barcode scanner works best in low light conditions.
- Always hold the scanner directly in front of and parallel to the barcode label.

## 3. SCAN THE AIRBAG SERIAL NUMBER

# ATTENTION: This information is **CRITICAL**

- Scan the **AIRBAG ASSEMBLY** serial number 2 times.
  - Confirm the cursor is in the first serial number box then scan the serial.
  - Position the cursor in the second serial number box then scan the serial.
- Click next.

### NOTE:

- If both serial numbers that are entered do not match, confirm and reenter.
- If the serial number barcode will not scan, it can be entered manually.

### AIRBAG SERIAL NUMBER IDENTIFICATION

- The airbag serial number is **ALWAYS** the 12 **DIGITS** located between the asterisks.
- The 3 digits before the asterisk **ARE NOT** part of the serial number, and **SHOULD NOT** be entered or an inaccurate response may be returned.

#### Airbag Serial Number Label Example

The **AIRBAG ASSEMBLY** serial number **MUST** be recorded prior to replacement.

Record Airbag Serial Number

#### How to Identify an Airbag module Assembly number?

The Airbag module Assembly serial number is a 12 digit code. It can be found along with a bar code on opening the Airbag assembly unit. To manually enter these details into the application, the technician has to identify the 12 digit code between two Asterisks (\*) inside the Airbag assembly unit. The first seven characters of this 12 digit code are numbers and the 10<sup>th</sup> digit is either 'K' or 'L' always.

Use of a barcode scanner is strongly recommended when entering Airbag Assembly Serial Number.

If manually typing serial number, you **MUST** include all leading zeros. (If applicable)

Airbag Serial #: \*\*\*\*\*12

## Original Inflator

How to Identify the Inflator serial code on the Original and Replacement Inflator can?

The Inflator serial code is an 11 digit code on the Inflator can. It can be found with a bar code on removing the Inflator can from the Airbag Assembly unit.

The first two characters of the **Original Inflator Serial code** will be from [AA, AB, AJ, FD or JD].

The first two characters of the **Replacement Inflator Serial code** will be either 'LT' or 'LR'.

## Replacement Inflator

Inflator Module replacement IS REQUIRED on all vehicles under the Safety Recall. Follow the technical instructions and acknowledge the following statements.

**If manually typing serial number, you MUST include all leading zeros. (If applicable)**

Original Inflator Serial #:

If old inflator serial number is not visible or missing, check this box.

\* Replacement Inflator Serial #:

**If you have a concern with the inflator serial numbers, please email [quality\\_compliance@toyota.com](mailto:quality_compliance@toyota.com) with details.**

- I agree to complete the safety recall's remaining technical instructions.
- I agree to perform a vehicle Health Check with Techstream upon completion of the safety recall's technical instructions.

(\* ) - Indicates Required Field(s)

Back Clear

c) Confirm agreement by checking the two boxes and press submit.

d) Record the Warranty Authorization # to be included in the warranty claim.

- d) Proceed to Section IX Step 2.

The new **AIRBAG ASSEMBLY** serial number **MUST** be recorded prior to reinstallation to track the airbag assembly to the vehicle.

## IX. VEHICLE REASSEMBLY

### 1. INSTALL THE NEW INFLATOR

a) Install the new inflator as shown.

b) Ensure that the inflator is oriented in the correct position as shown.

- Make sure the inflator is correctly positioned.
- The inflator cannot be fully inserted if it is upside down.

Check orientation

Check orientation

R1701280026Z01

Install temporarily  
by hand.

e) Install the **NEW** positioner plate.

f) Temporarily install 2 **NEW** nuts.

**Install temporarily by hand.**

- g) Remove and discard the 3 remaining nuts.
- h) Temporarily install 3 **NEW** nuts.

i) Push the inflator towards the position determining plate and eliminate any gaps.

- If any gaps exist, the flats may move apart and could result in abnormal operation during airbag deployment.

(a) Replacement of parts.

(b) No gap.

(b) Check orientation.

(b) Check orientation.

R1701260003Z01

j) Tighten the 5 nuts evenly in several increments in the sequence shown. Use a socket driver or torque wrench to tighten the nuts.

Torque: 35 in. lbf (3.9N·m)

- There will be some resistance when tightening the nuts because they are self-locking, confirm the nuts are tightened correctly.
- **DO NOT** use a power tool, T-handle, or ratchet when tightening the nuts to avoid over torquing and deforming the studs.
- You may need to slide the airbag to the left or right with in the mounting bracket to access the center nut.

# OK

# NG

# NG

# NG

## These tools cause overtightening !

R1701260011Z01

k) Engage the 2 clamps for the new wire harness.

l) Connect the connector and the secondary lock.

**NOTE: Ensure that the connector is securely connected.**

## 2. REINSTALL THE AIRBAG ASSEMBLY INTO THE INSTRUMENT PANEL

- a) Position the airbag assembly in the instrument panel, engage the straps, and then install the 4 bolts.

- The bolts do NOT need to be replaced. Reinstall the original bolts

**NOTE:** Ensure the airbag connectors is positioned as shown

- b) Install the 2 screws and the heater to register duct.  
c) Install the 3 screws and the side defroster nozzle.

### 3. REINSTALL THE DASH

a) Refer to TIS for reinstallation instructions

IS 250/350	<a href="#">2006 MY</a>	<a href="#">2007 MY</a>	<a href="#">2008 MY</a>	<a href="#">2009 MY</a>	<a href="#">2010 MY</a>	<a href="#">2011 MY</a>	<a href="#">2012 MY</a>
IS F	<a href="#">2008 MY</a>	<a href="#">2009 MY</a>					

4. RECONNECT THE NEGATIVE BATTERY CABLE
5. PERFORM A HEALTH CHECK AND DIAGNOSTIC REPORT
6. PERFORM ANY NEEDED SYSTEM INITIALZATIONS

## ◀ VERIFY REPAIR QUALITY ▶

- Confirm all precautions are followed to ensure safety during the repair
- Confirm the entire serial number checker application is completed and the warranty authorization # is recorded on *EVERY* vehicle
- Confirm the old airbag is handled safely and given to the appropriate parts professional for shipment

If you have any questions regarding this update, please contact your area representative.

## X. APPENDIX

### A. CAMPAIGN DESIGNATION DECODER

### B. CAMPAIGN PARTS DISPOSAL

**ALL** airbags that are removed from vehicles under this campaign **MUST** be packaged and shipped back to the manufacturer following the manufacturer's instructions. The instructions can be found in the following locations:

- Attached to the dealer letter
- Included in the parts box
