TECHNICAL INSTRUCTIONS

FOR

SAFETY RECALL J0A/J0B/J0C

FRONT PASSENGER AIRBAG INFLATOR MODULE

CERTAIN 2003 – 2005 MODEL YEAR COROLLA

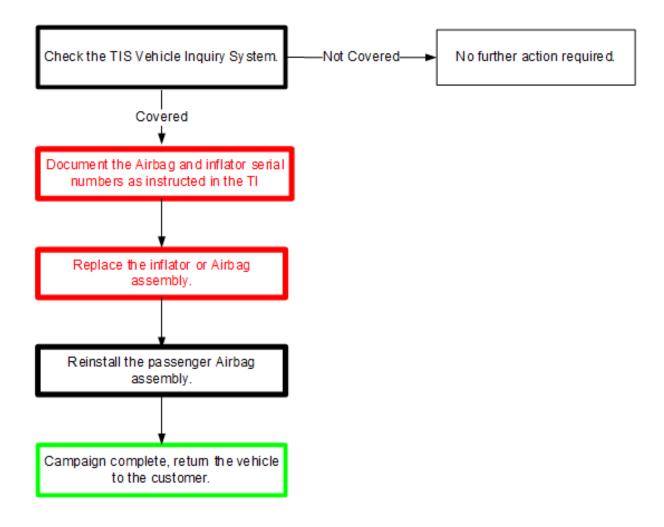

All dealership technicians performing this recall are required to successfully complete the most current version of the E-Learning course "Safety Recall and Service Campaign Essentials". To ensure that all vehicles have the repair performed correctly; technicians performing this recall repair are required to have successfully completed E-Learning course SC18A (if you had previously completed E-Learning Course SC13B, you do not have to take SC18A), in addition to "Safety Recall and Service Campaign Essentials", and currently hold <u>at least one</u> of the following certifications levels:

- Toyota Certified (Electrical)
- Toyota Expert (Any Specialty)
- Master
- Master Diagnostic Technicians

NOTE: The videos in this document were created for D0F/DSF, but are used in this document to help supplement the technical instructions.

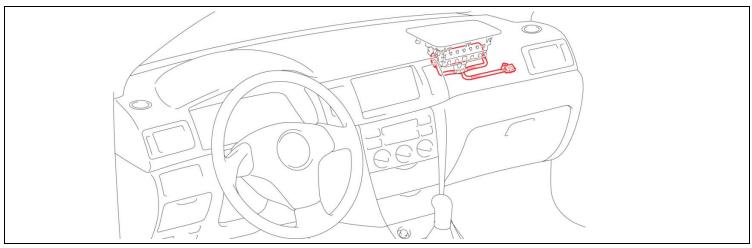

I. OPERATION FLOW CHART

The flow chart is for reference only. *DO NOT* use it in place of the full technical instructions. Follow *ALL* steps as outlined in the full technical instructions to confirm the campaign is completed correctly.

II. BACKGROUND

The subject vehicles are equipped with front passenger airbag inflators produced by Takata. The propellant in these inflators may degrade after prolonged exposure to high absolute humidity and fluctuating high temperatures. Degraded propellant can cause the inflator to explode during airbag deployment. In the event of an inflator explosion, metal fragments could pass through the airbag cushion material, striking the vehicle occupants, and result in serious injury or death.

III. IDENTIFICATION OF AFFECTED VEHICLES

- Check the TIS Vehicle Inquiry System to confirm the VIN is involved in this Safety Recall, and that the campaign has not already been completed prior to dealer shipment or by another dealer.
- TMS warranty will not reimburse dealers for repairs conducted on vehicles that are not affected or were completed by another dealer.

IV. PREPARATION

A. PARTS

Model	Part Number	Part Description	Quantity		
2003-2004 MY Corolla	04008-10212	AIR BAG ASSY KIT, INSTR PNL PASS	1		
2005 MY Corolla	04008-10312	0312 INFLATOR ASSY KIT, INSTR PNL AIR BAG *			
	*The kit above inc	ludes the following parts.	·		
Γ	Inflato	or 1			
	Self Lockir	ng Nut 4			
	Stopper F	Plate 1			
	Position Determining Plate 1				
	Electro	Гар 1			
	Felt Tape	Strips 2			

Non-Desiccated Part Recovery

Dealers should <u>discontinue the installation</u> of the non-desiccated parts listed below for recall, customer pay repairs AND over-the-counter sales (if applicable).

Model	Model Year	L	ocation	Part N	umber	Part Description		Qty
	2003-2004	48 States i	n Continental U.S.	04003-28102				
Corolla			, Hawaii & AK	04003-11102		INFLATOR ASSY KIT,		1
Corolla	2005-2008	48 States i	n Continental U.S.	04004	-75202	INSTR PNL AIRB	BAG	1
2005-2008	USTT, Hawaii & AK		04004	75102				
	Model	Model Year	Part Numb	er	Par	t Description		
	Corolla	2003-2004	73970-02040 73970-02040 73970-02040)-B1	AIF	R BAG ASSY,		
	Corolla	2005-2008	73970-02051 73970-02051 73970-02051	-B1	INS	TR PNL PASS		

Toyota requires all dealers to return any parts listed above that still remain in dealer inventory by utilizing the Hazmat Part Return Program available. Dealers will be issued a refund for all part returns. This part return program is outlined in *PANT Bulletin 2014-042*.

Important Note:

In order to return the inflator, packages must **NOT** be opened/tampered with.

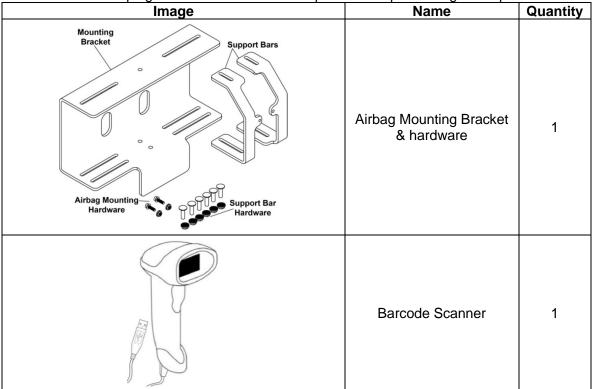

A. TOOLS & EQUIPMENT

- Standard hand tools
- Molding remover set
- Torque wrench
- Techstream
- Electrical tape
- Zip Tie

OPTIONAL SST – This is an essential special service tool that the dealership should have. This tool is not mandatory when performing this repair.

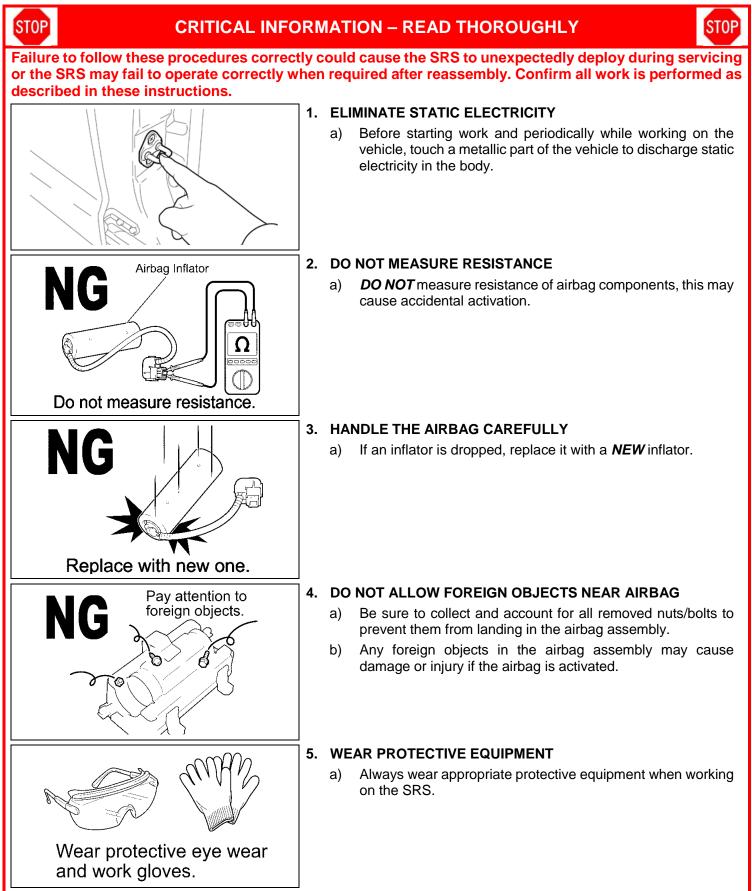

Part Number	Part Name	Quantity
09890-47010-01	Anti-Static Mat Set	1

E04 CAMPAIGN TOOLS – These tools where previously provided to the dealership for campaign D0F and will be used for campaign E04. These tools are required when performing this repair.

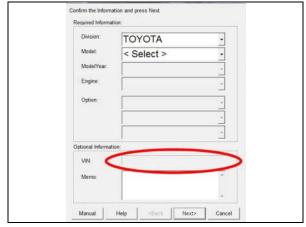

NOTE: These tools *CANNOT* be ordered through the parts or tools system. There is a very limited supply of tools, but if additional tools are needed, contact your regional representative.

V. SAFETY PRECAUTIONS

VI. SRS SYSTEM HEALTH CHECK

1. PERFORM A HEALTH CHECK

- a) Confirm the Techstream is connected to the dealership's internet.
- b) When launching the Techstream software the VIN **MUST** be entered manually.

NOTE: All letters of the VIN *MUST* be entered in ALL CAPS, or the VIN will need to be reentered when running the diagnostic report.

c) Perform a health check.

Note: The VIN may auto populate on the later model year vehicles, if this happens DO NOT change the VIN.

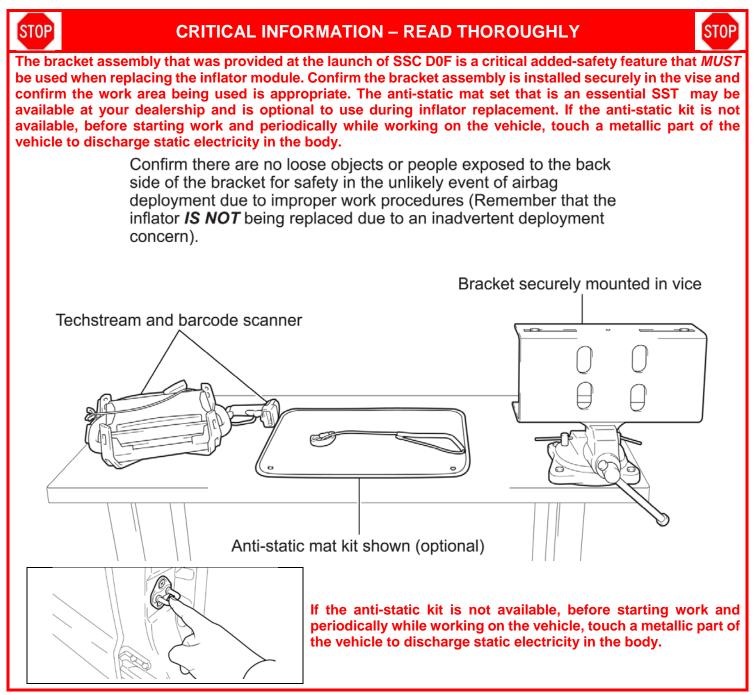

2. RUN A DIAGNOSTIC REPORT

a) After the health check has completed, run a diagnostic report by clicking on the link on the health check screen.

Monitor Status	DTC	Curr	Pend	Hist	Perm	SB Calibration	Update	F	NOTE: If the VIN was not entered in ALL CAPS when Techstream was launched, an error will be displayed
								-	and there will be a prompt to reenter the VIN

• The serial number recording application will be disabled and the repair cannot be completed if a health check and diagnostic report is not performed and recorded by TMS.

VII. WORK AREA PREPARATION

VIII. PASSENGER AIRBAG INFLATOR REPLACEMENT

1. LAUNCH THE SERIAL NUMBER RECORDING APPLICATION

ST0P

- The AIRBAG ASSEMBLY, ORIGINAL INFLATOR, and NEW INFLATOR serial numbers MUST be recorded using the barcode scanner (provided at the launch of SSC D0F).
- The barcode scanner application MUST be completed on every vehicle. These numbers MUST be included on every warranty claim that is submitted for inflator module replacement or the claim may be subject to debit.
 - The technician performing the work MUST have valid TIS login credentials and an internet connection to perform the inspection and scanning process.
- a) Log in to TIS and input the VIN of the vehicle in the Vehicle Inquiry tab.
- b) Confirm the VIN is applicable and that the campaign has not been completed.
- c) Click on the link to launch the serial number recording application.

Note: The Serial Number Recording Application is the same as the DSF application, so the screens will still indicate campaign DSF.

e) Record the vehicle mileage into the serial number recording application.

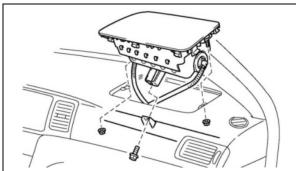

NOTE:

- A task status screen will populate next and at other intervals during the repair. This screen will indicate if the inflator was replaced or in some limited cases that the entire airbag assembly was replaced. Click 'next' to proceed to the next step. This information will be used for record keeping by TMS.
- If this screen indicates that the inflator has already been replaced on this VIN, there is no need to perform the campaign again.

3. REMOVE THE AIRBAG ASSEMBLY

2. REMOVE THE GLOVE BOX

- a) Remove the screw and disconnect the stopper sub-assembly.
- b) Completely remove the glove box from the dashboard.

a) Disconnect the negative battery cable.

- Wait at least 90 seconds after disconnecting the cable from the negative battery terminal to prevent airbag and seat belt pre-tensioner deployment.
 - Follow all precautions as outlined on TIS before servicing the SRS system.
- b) Disconnect the airbag connector.

c) Remove the bolt and 2 nuts and remove the airbag assembly. NOTE: Use caution to avoid scratching or damaging the dashboard assembly, place protective tape on the dashboard if needed.

4. CONNECT THE BARCODE SCANNER

- a) Connect the barcode scanner to the USB port on the Techstream.
- b) The scanner will automatically connect and a beep will be heard when the scanner is ready.

NOTE:

- The scanner was provided for SSC D0F.
- The scanner works best in low light conditions.
- Always hold the scanner directly in front of and parallel to the barcode label.

ATTENTION: This information is **CRITICAL**

- a) Scan the **AIRBAG ASSEMBLY** serial number 2 times.
 - 1) Confirm the cursor is in the first serial number box then scan the serial.
 - 2) Position the cursor in the second serial number box then scan the serial.
- b) Click next.

NOTE:

- If both serial numbers that are entered do not match, confirm and reenter.
- If the serial number barcode will not scan, it can be entered manually.

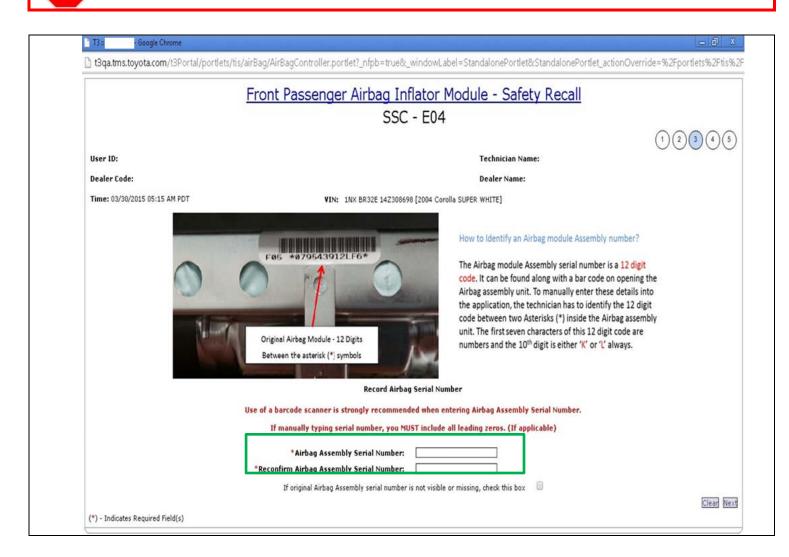

AIRBAG SERIAL NUMBER IDENTIFICATION

- The airbag serial number is *ALWAYS* the 12 *DIGITS* located between the asterisks.
- The 3 digits before the asterisk *ARE NOT* part of the serial number, and *SHOULD NOT* be entered or an inaccurate response may be returned.

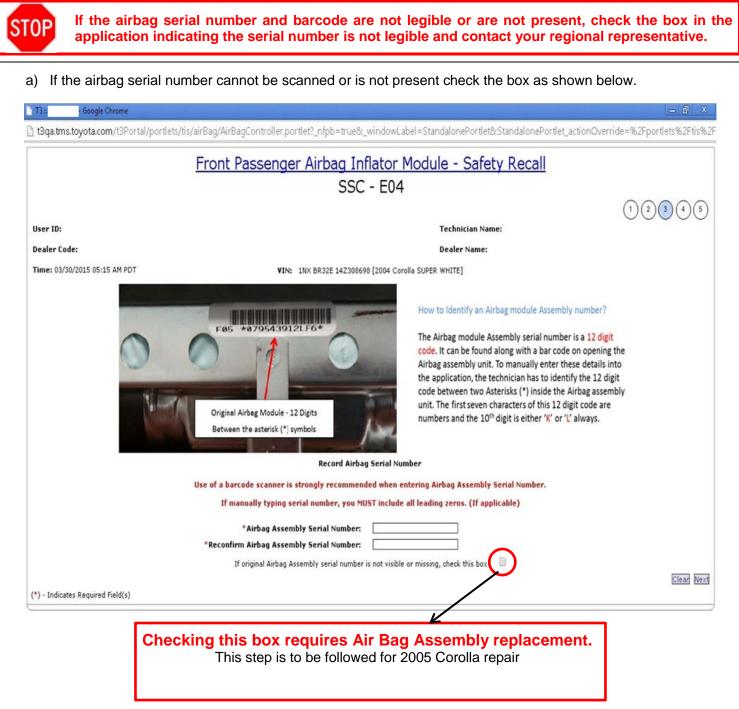

Airbag Serial Number Label Example

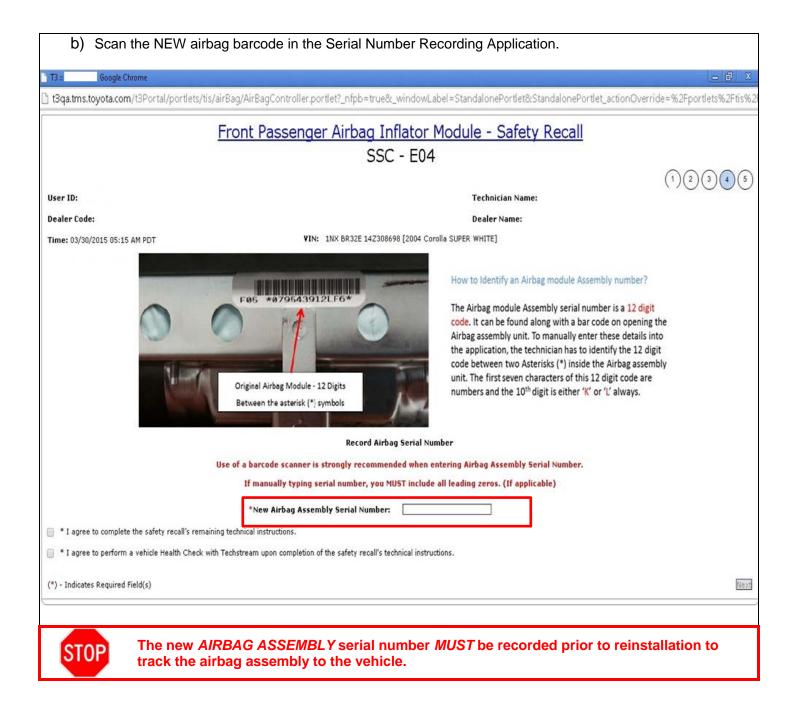

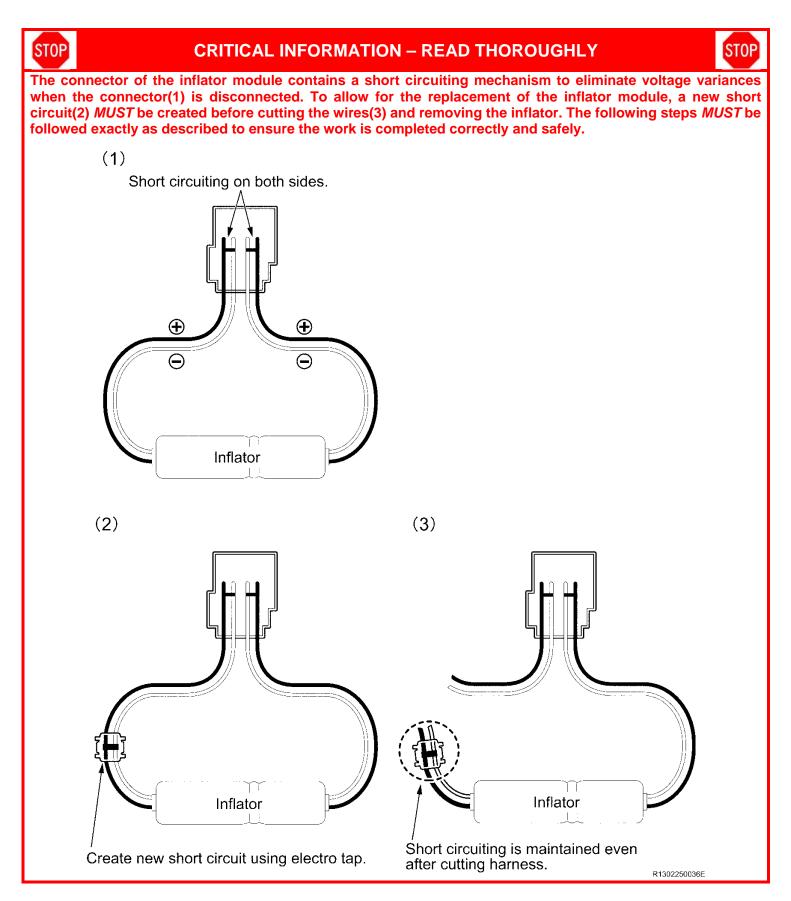

The AIRBAG ASSEMBLY serial number and the INFLATOR serial number are DIFFERENT. The AIRBAG ASSEMBLY serial number MUST be recorded prior to replacement.

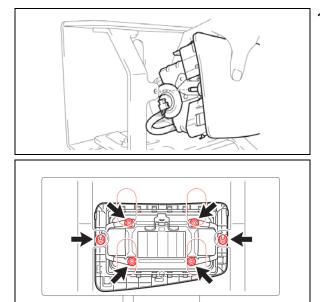

AIRBAG ASSEMBLY SERIAL NUMBER FOR <u>2003-2004 MY COROLLA ASSEMBLY REPAIR</u> (OR SERIAL NUMBER IS MISSING OR IS UNREADABLE)

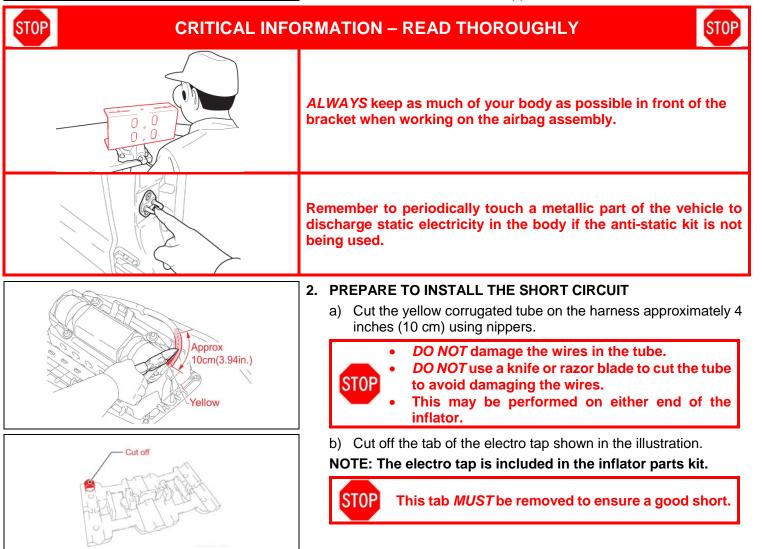

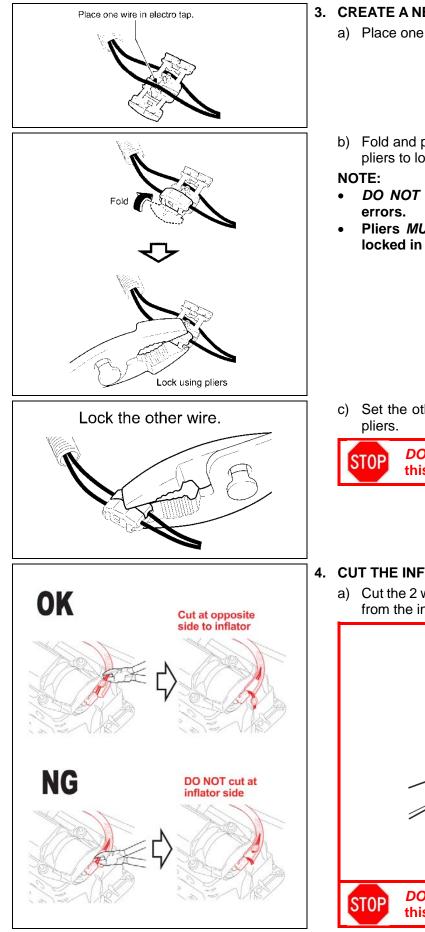

AL.

1. MOUNT THE AIRBAG IN THE MOUNTING BRACKET

- a) Position the two mounting studs on the airbag assembly into the holes on the bracket support bars.
- b) Install the airbag to the support bars with the nuts supplied in the bracket kit.
- c) Position the airbag so that all four stopper plate nuts can be removed through the access holes.
- d) Tighten the nuts holding the support bars to the mounting bracket.
- e) Confirm the following:
 - Mounting bracket is secure in the vise.
 - Airbag is secure in the support bars.
 - The center mounting bracket on the airbag assembly is facing upward.
 - Support bars are secure on the mounting bracket using 1 bolt/nut at the top of each support bar and 2 nuts/bolts at the bottom of each support bar.

3. CREATE A NEW SHORT CIRCUIT IN THE INFLATOR HARNESS

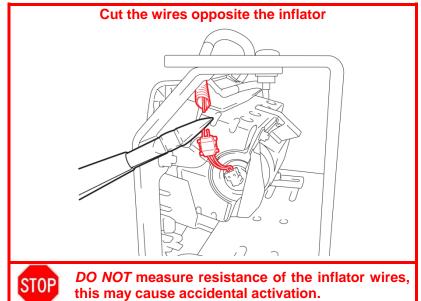

- a) Place one wire in the electro tap as shown in the illustration.
- b) Fold and pinch the half of the electro tap with the wire and use pliers to lock the electro tap.
- DO NOT work on both wires at the same time to avoid
- Pliers *MUST* be used to confirm the electro tap is firmly locked in place.

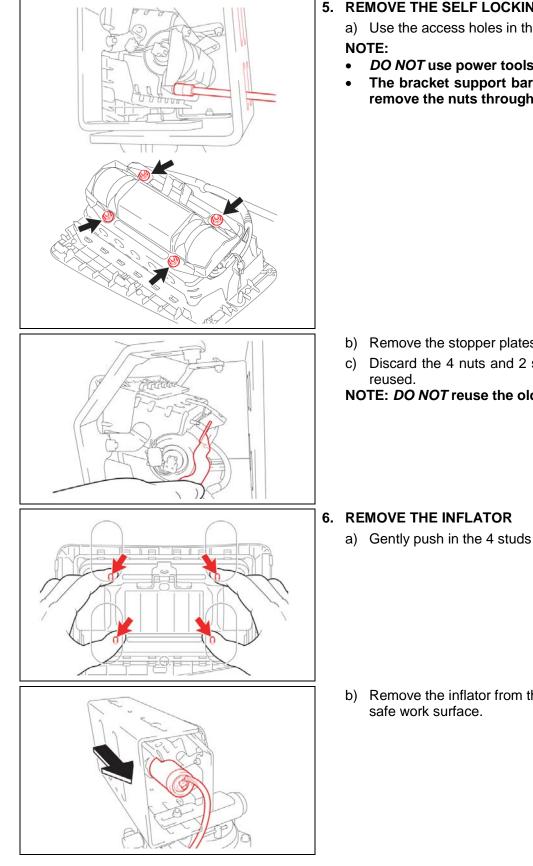

c) Set the other wire in the electro tap and lock it in place using

DO NOT measure resistance of the inflator wires, this may cause accidental activation.

4. CUT THE INFLATOR WIRES

a) Cut the 2 wires at the side of the electro tap that is farthest away from the inflator.

5. REMOVE THE SELF LOCKING NUTS

- a) Use the access holes in the bracket to remove the 4 nuts.
- DO NOT use power tools.
- The bracket support bars may need to be repositioned to remove the nuts through the access holes.

- b) Remove the stopper plates.
- c) Discard the 4 nuts and 2 stopper plates as they are not to be

NOTE: DO NOT reuse the old nuts, new nuts MUST be used.

a) Gently push in the 4 studs to loosen the inflator for removal.

b) Remove the inflator from the airbag assembly and place it on a

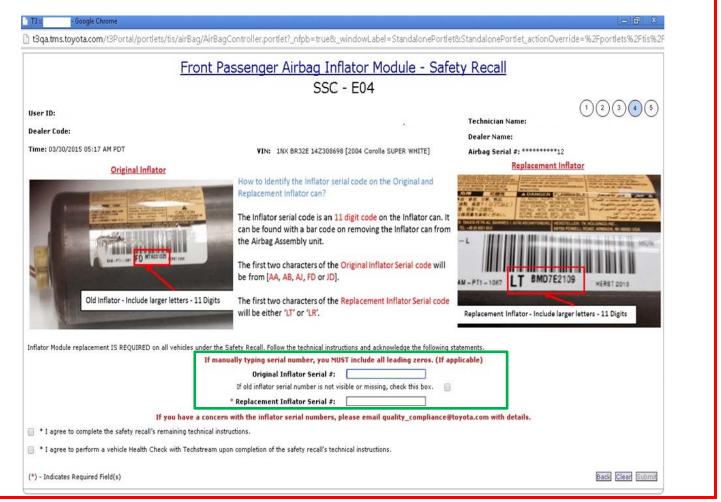

ENSURE YOU ENTER BOTH THE OLD AND NEW INFLATOR SERIAL NUMBERS IN THE APPROPRIATE SPOT OF THE APPLICATION -DO NOT ENTER THE AIRBAG SERIAL NUMBER FOR THIS STEP-

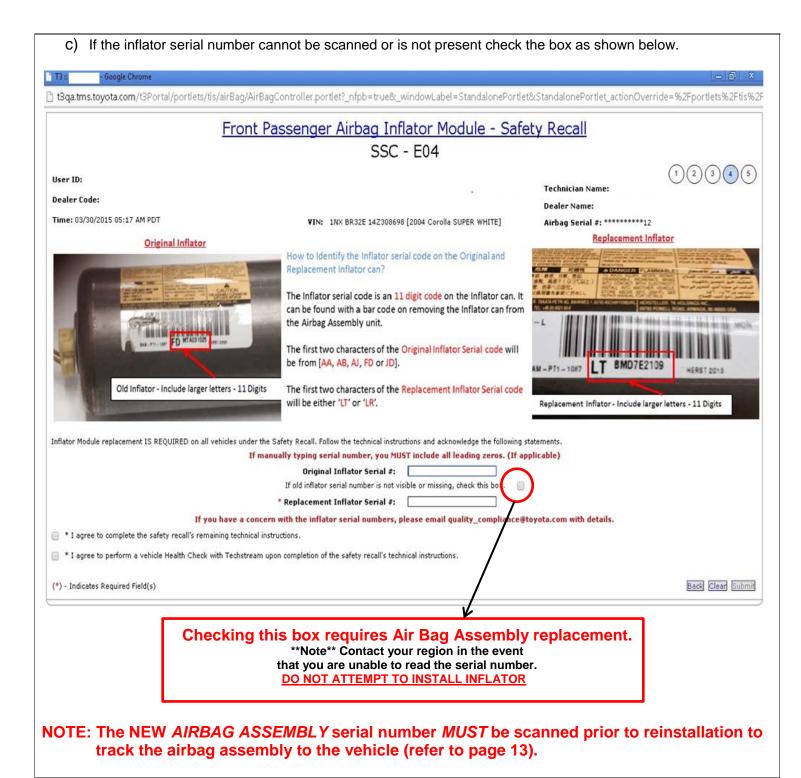

- 7. SCAN THE OLD AND NEW INFLATOR SERIAL NUMBER
 - a) Scan the OLD inflator serial number and mark the old inflator so that it will not be reused.
 - b) Scan the *NEW* inflator serial number.

STOP

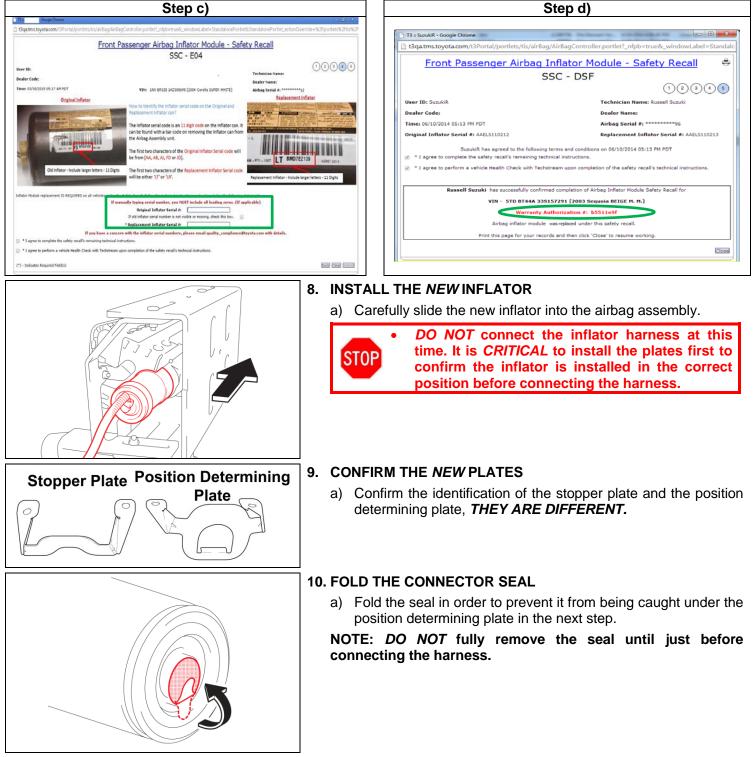

ATTENTION: This information is **CRITICAL**

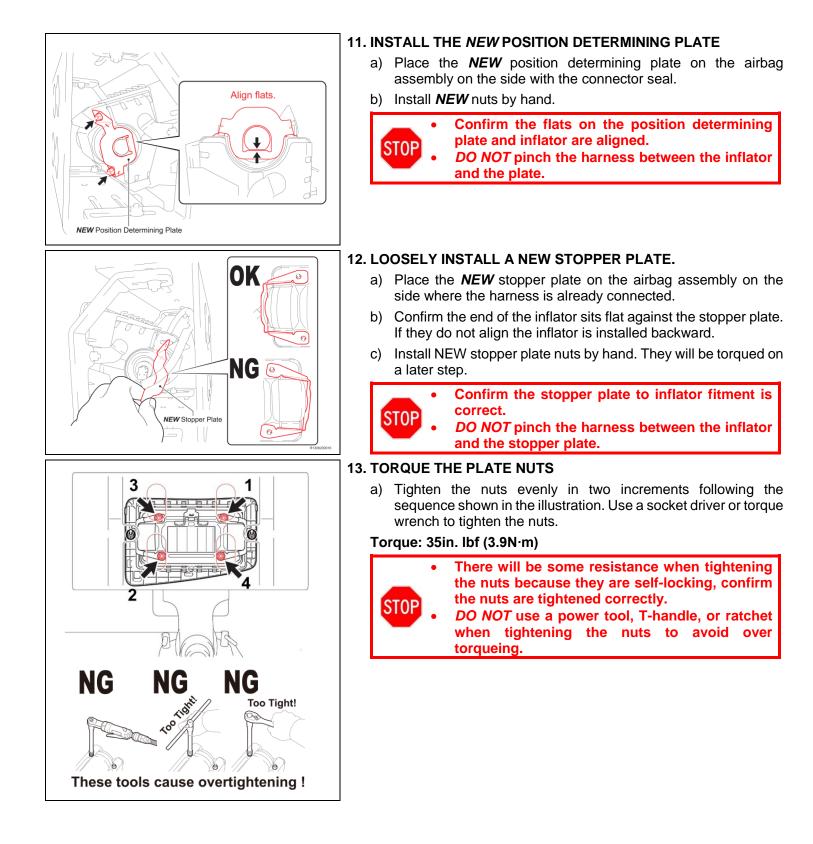

- It is used to confirm the correct inflator is removed from the vehicle.
- It is recorded by TMS to trace the return parts shipment.
- It is used to track the new inflator that is being installed in the vehicle.

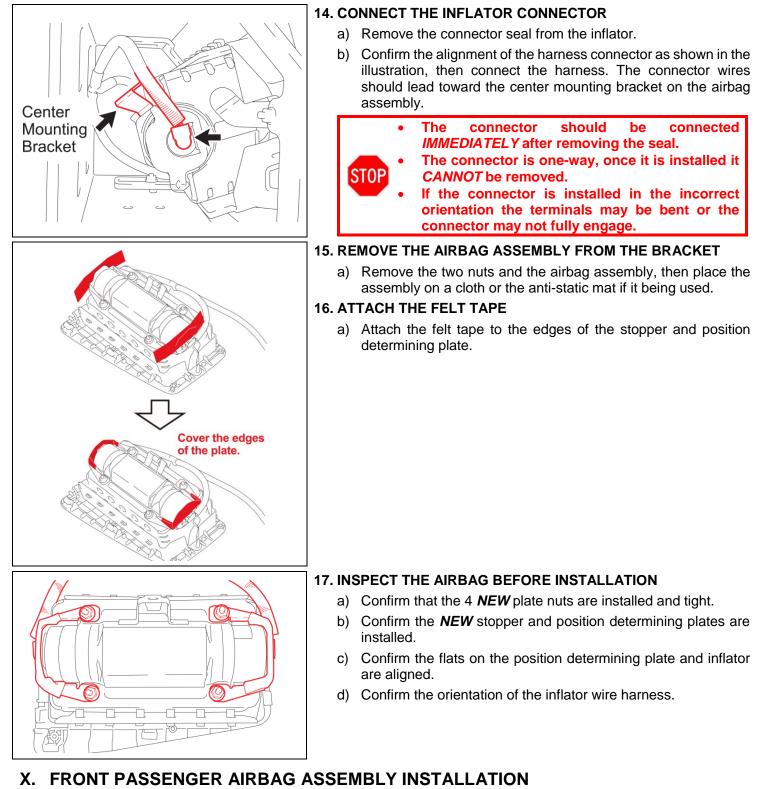

- d) Confirm agreement by checking the two boxes.
- e) Record the Warranty Authorization # to be included in the warranty claim.
- f) Place the old inflator in the parts box and take it immediately to the parts department. **NOTE:**
- Confirm the cursor is in the correct serial number input box before scanning.
- If the serial number barcode will not scan, it can be entered manually.
- If there are any difficulties or concerns with this process, email quality_compliance@toyota.com with details.

1. REINSTALL THE AIRBAG ASSEMBLY

Note: During reinstallation of the airbag assembly, ensure the 12mm bolt and two 10mm nuts securing the airbag assembly to the instrument panel are installed and torqued to the required specification identified on TIS.

a) Refer to TIS for instructions on airbag installation:

Corolla <u>2003-2005MY</u>

- 2. RECONNECT THE NEGATIVE BATTERY CABLE
- 3. PERFORM A HEALTH CHECK AND DIAGNOSTIC REPORT

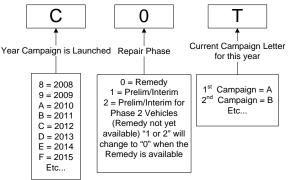

◄ VERIFY REPAIR QUALITY ►

- Confirm all precautions are follow to ensure safety during the repair
- Confirm the entire serial number checker application is completed and the warranty authorization # is recorded on *EVERY* vehicle
- Confirm the old inflator is handled safely and given to the appropriate parts professional for shipment
- Confirm the inflator harness connector is fully engaged and that the stopper plate and position determining plate are installed correctly

If you have any questions regarding this update, please contact your regional representative.

XI. APPENDIX

A. CAMPAIGN DESIGNATION DECODER

B. CAMPAIGN PARTS DISPOSAL

ALL inflators that are removed from vehicles under this campaign **MUST** be packaged and shipped back to the inflator manufacturer following the manufacturer's instructions. The instructions can be found in the following locations:

Attached to the dealer letter
