VOLUNTARY RECALL CAMPAIGN
2018 370Z COUPE; DRIVER CURTAIN AIR BAG MODULE

CAMPAIGN ID #: R1802
APPLIED VEHICLES: 2018 370Z Coupe (Z34)

Check Service COMM or Dealer Business Systems (DBS)
National Service History to confirm campaign eligibility.

INTRODUCTION

Nissan is conducting this voluntary recall campaign on certain specific model year 2018 370Z Coupe vehicles. The driver curtain air bag module will be inspected and if necessary, adjusted. This service will be performed at no charge to the customer for parts or labor.

IDENTIFICATION NUMBER

Nissan has assigned identification number R1802 to this campaign. This number must appear on all communication and documentation of any nature dealing with this campaign.

DEALER RESPONSIBILITY

It is the dealer’s responsibility to check Service COMM or Dealer Business Systems (DBS) National Service History for the campaign status on each vehicle falling within the range of this voluntary safety recall which for any reason enters the service department. This includes vehicles purchased from private parties or presented by transient (tourist) owners and vehicles in a dealer’s inventory. Federal law requires that new vehicles in dealer inventory which are the subject of a safety recall must be corrected prior to sale. Failure to do so can result in civil penalties by the National Highway Traffic Safety Administration. While federal law applies only to new vehicles, Nissan strongly encourages dealers to correct any used vehicles in their inventory before they are retailed.
REPAIR OVERVIEW

Use Service COMM (campaign ID # R1802) to confirm this campaign applies.

Remove the headlining for driver curtain air bag module inspection.

Curtain portion of driver curtain air bag module is twisted (fails inspection).

Adjust the driver curtain air bag module as needed.

Reassemble the vehicle.

Curtain portion of driver curtain air bag module is NOT twisted (passes inspection).

END
SERVICE PROCEDURE

Removal: Headlining

IMPORTANT: Follow all warnings, cautions, and notes in the Electronic Service Manual (ESM) when working on or near a Supplemental Restraint System (SRS), such as an air bag.

NOTE:

- Use protective covering for all interior surfaces as needed while performing this procedure.
- Always use plastic interior trim tools.
- Make sure hands/gloves are clean when working on the vehicle’s interior.
- Store all removed parts in a clean area where they will not get damaged.
- Throughout this repair procedure, when the part is the same on both sides of the vehicle, there may be only one picture of that part regardless of which side. The procedure to remove or install these parts on each side will be the same.

1. Turn the ignition ON with engine OFF.

2. Lower both driver and passenger door windows.

3. Turn the ignition OFF, disconnect the negative battery cable, and then wait for at least three (3) minutes.
4. Remove the left hand and right hand (LH and RH) kicking plates inner (see Figure 1 and 2).

\( \Rightarrow \Rightarrow \) = Pawl

5. Remove the LH and RH dash side finishers.
   - Remove the plastic nut.
   - Use a suitable plastic pry tool.

\( \curvearrowright \curvearrowright \) = Clip
6. Remove the LH and RH body side welts.

7. Remove the LH and RH pillar garnishes (A pillar finishers).
   a. Disengage the clips with a plastic trim tool.
   b. Cut the front pillar garnish fixing clips with “side” cutters or other suitable tool.

   **NOTE:** The fixing clips will be replaced with new ones (see Parts Information).
8. Carefully unfasten the roof assembly harness fixing clips with a pick or similar suitable tool, and then disconnect the related harness connector.

- Work the pick under the lip of the clip, press in on its pawl, and then lift out.

9. If equipped: Disconnect the inside mirror assembly harness connector.

**NOTE:** Do not remove the inside mirror assembly. Mirrors without an electrical connection that have been removed will need to be replaced (one-time use/installation).
10. If equipped: Remove the inside mirror finisher.

11. Remove the LH and RH sun visors:
   
a. Carefully remove the sun visor covers.

   • Using a pick or similar suitable tool to unsnap one corner and finishing removal with your fingers helps prevent tab breakage (see Figure 11, 12, and 13).

   **CAUTION:** If handled too rough, the sun visor cover's tabs can break during removal. Be careful when removing this part.
CAUTION: If handled too rough, the sun visor cover’s tabs can break during removal. Be careful when removing this part.

b. Remove the screws located under the sun visor cover.

c. If equipped: Carefully pull out the vanity mirror lamp harnesses, and then disconnect the harness connectors.

12. Remove the sun visor holders:

   a. Insert a “pocket” screwdriver or similar suitable tool through the slot on the backside of the holders.

   b. Press against the pawl, and then twist the holder 90° counterclockwise.
13. Recline both seatbacks forward, and then move both seats in their forward most positions.

![Figure 16](image1)

14. If equipped: Remove the tonneau cover.

![Figure 16](image2)

15. Remove the LH and RH rear side finisher mounting bolts (see Figure 17).

16. Remove the LH and RH rear parcel shelf side finishers (see Figure 17).

![Figure 17](image3)
17. Remove the rear parcel shelf finisher holder (see Figure 18 and 19).

18. Remove the LH and RH rear parcel shelf covers using a suitable plastic pry tool (See Figure 18 and 20).

\[ = \text{Clip} \]
19. Remove the luggage floor carpet.

20. Remove the spare tire cover.

21. Remove the back door weather strip.
22. Remove the rear luggage plate:
   a. If equipped: Remove the luggage trunk net (not shown in picture).
   b. Remove the luggage rear plate fixing trunk net hooks.
   c. Carefully unfasten the rear luggage plate upper clips with a suitable plastic pry tool (see Figure 25 and 26).
   d. Disconnect the luggage rear lamp electrical connector (not shown in picture).
   e. Remove the luggage rear lamp assembly from the luggage rear plate.
      - Lamp removal is for reassembly purposes.

   **CAUTION:** Do not remove the luggage rear lamp until AFTER removing the luggage rear plate. Removing it earlier may damage it.

23. Remove the luggage spacer (see Figure 24).

   **CAUTION:** Place the plastic pry tool nearest to each clip before prying. Otherwise, damage may occur to the rear luggage plate.

   - See clip locations in Figure 26.
24. Remove the luggage side finisher upper fixing trunk net hooks.

25. Remove the end clips on the LH & RH luggage side finishers upper.
26. Using a suitable plastic pry tool, carefully unfasten the luggage side finisher upper pawls and clips, and then remove the LH & RH luggage side finishers upper.

- Pawl and clip locations are shown in Figure 30. Locations are the same on the LH & RH luggage side finishers upper.
27. Remove the LH & RH rear side finishers:

a. Carefully unfasten the rear side finisher pawls and clips (see Figure 31 and 32).

- Pawl and clip locations are shown in Figure 32. Clip locations are the same on the LH & RH rear side finishers.

b. Disconnect the rear speaker harness connectors.
28. Remove the LH & RH rear pillar finishers:

a. Remove the seat belt shoulder anchor mounting bolt covers, and then remove the bolts (see Figure 34 and 35).

b. Carefully unfasten the pawls and clips with a suitable plastic trim tool.

- Pawl and clip locations are shown in Figure 35. Clip locations are the same on the LH & RH rear pillar finishers.

c. Disconnect the outside key antenna harness connectors.
29. Recline both seatbacks, and then move both seats in their rearmost positions.

**NOTE:** When performing steps 30 and 31, the headlining will start to drop down.

30. Unfasten the roof center console clips (see Figure 37 and 38).
31. Unfasten the rear headlining clips (see Figure 37 and 39).
32. Carefully remove the headlining through the passenger door opening.

Go to “Inspection: Driver Curtain Air Bag Module” on the next page.
33. Inspect the rear section of the driver curtain air bag module:

- See Figure 40, 41, and 42 for examples of OK and NG inspection results.

- If the blue line does not wrap around the backside of the curtain, the driver air bag module is OK. Reassemble the vehicle (go to “Installation: Headlining”).

- If the blue line wraps around the backside of the curtain or wrapped where no blue line can be seen (the curtain is twisted), the curtain fails inspection. Go to step 34.
34. Unbolt the four (4) bolts (see Figure 43).
   
   - Do not reuse these bolts, they will be replaced with new ones (see Parts Information).

35. Untwist the curtain until all of the blue line is visible or not wrapped around the backside of the curtain (see page 18, Figure 40).

36. Secure the driver curtain air bag module with four (4) new bolts (see Parts Information).
   
   - Bolts torque: 10.8 N•m (1.1 kg-m, 8.0 ft lbs)

Go to “Installation: Headlining” on the next page.
**Installation: Headlining**

1. Carefully put the headlining inside the vehicle through the passenger door opening.
   - Start with the rear of the headlining through the door opening.

2. While holding up the headlining in place, install the LH and RH sun visor holders (see Figure 45).
   - The installed holders will align the headlining’s clips with their related holes.

3. Snap in place the headlining rear clips and roof center console clips to the inside of the roof.

![Figure 44: Diagram of headlining installation](image)

![Figure 45: Picture of headlining installation](image)
4. Install the LH & RH rear pillar finishers:
   a. Connect the outside key antenna harness connectors.
   b. Carefully install the rear pillar finishers.
   c. Install the seat belt shoulder anchor mounting bolts and covers.
      - Anchor mounting bolts torque: 49.0 N•m (5.0 kg-m, 36 ft lbs)
5. Install the LH & RH rear side finishers:
   a. Connect the rear speaker harness connectors.
   b. Carefully install the rear side finishers.

6. Carefully install the LH and RH luggage side finishers upper.

7. Install the luggage side finisher upper fixing trunk net hooks.
8. Install the LH & RH luggage side finisher upper end clips.

9. Install the luggage spacer.

10. Install the rear luggage plate.
    a. Put the rear luggage plate in place, but do not fasten in its clips.
    b. Pull the luggage rear lamp harness connector through the luggage rear plate's opening.
    c. Carefully fasten the rear luggage plate’s upper clips now.
    d. Connect the harness connector to the luggage rear lamp assembly, and then snap in place the luggage rear lamp.
    e. Install the luggage rear plate fixing trunk net hooks.
11. Install the back door weather strip.
   - When installing, align the weather strip’s seam with the back door latch opening in the luggage rear plate.

12. Install the spare tire cover.

13. Install the luggage floor carpet.
   - If equipped: Install the luggage trunk net.

15. Install the rear parcel shelf finisher holder.

16. Install the LH and RH rear parcel shelf side finishers.

17. Install the LH and RH rear side finisher bolts.

18. If equipped: Install the tonneau cover.
19. Install the LH and RH sun visors:

a. If equipped: Connect the vanity mirror lamp harness connectors.

b. Secure the sun visors with the screws.

c. Install the sun visor covers (not shown in picture).

**CAUTION:** Press in place the covers until all tabs snap in place. Do not hit or force them in place. The tabs may break if hit or forced in place.
20. If equipped: Connect the inside mirror assembly harness connector.

![Figure 61](image1)

21. If equipped: Install the inside mirror finisher.

![Figure 62](image2)

22. Fasten the roof assembly harness fixing clips, and then connect the related harness connector.

![Figure 63](image3)
23. Install new front pillar garnish fixing clips on the LH and RH pillar garnishes.
   - Use new pillar garnish fixing clips (see Parts Information).

24. Install the LH and RH pillar garnishes.
   - Make sure both the metal clips and front pillar garnish fixing clips are fully snapped in place.

25. Install the LH and RH body side welts.
28. Reconnect the negative battery cable.

29. Reset/reinitialize systems as needed.

- Refer to the ESM, section GENERAL INFORMATION – BASIC INSPECTION – ADDITIONAL SERVICE WHEN REMOVING BATTERY NEGATIVE TERMINAL, for a listing of systems that require reset-initialization after reconnecting the 12 V battery.

- This list often includes items such as the power windows, auto-air conditioning, sunroof, etc.
