

Sundance XLT TT tire load range

Description

It has been decided the vehicles in this recall population may have been manufactured with ST205/75R14 Load Range “C” Tires rated for 1760 lbs. instead of ST205/75R14 Load Range “D” Tires rated for 2040 lbs. These insufficient load range tires were inadvertently mixed in with the correct load range tires at the plant.

Inspection & Repair

Identify the Current tire on the RV

1. Verify the tire size and load range – tire is a ST205/75R14 with load range “D” no repair is required file claim for inspection only.

Tire size listed on sidewall. The correct tire size is ST205/75R14

Load range listed on sidewall. The correct load range is “D”

Serial number from each tire is required for the claim. This will be the # after DOT and will be 8 digits.

File Recall Inspection warranty claim using warranty code 99.01.39.L

Note: No warranty will be paid if the VIN is not part of the affected list or the tires serial numbers are not provided. (A list or photos are acceptable)

2. The tires on the RV have the incorrect load range. Tire are load Range “C” than they will need replaced with Load range “D” as listed on the VIN tag and Tire Plaque on the sidewall.
3. Order replacement tires and replace, once replaced file warranty claim.
