Version 1

Safety Recall: High Mount Brake Light

AFFECTED VEHICLES

Year	Model	Trim	VIN Range
2017	NSX	ALL	Check the iN VIN status for eligibility.

BACKGROUND

There is an internal issue with the circuit board in the high mount brake light (center high mount brake light). Under certain circumstances, the circuit board may short and blow the corresponding fuse. If this occurs, all the brake lights will stop working, which increases the risk of a collision. Several malfunction indicator lamps will turn on to indicate the brake light failure. Additionally, the blown fuse prevents the vehicle from being restarted once it's turned off.

When this temporary placeholder bulletin appears during an iN VIN Status Inquiry, this vehicle is subject to a Safety Recall. This vehicle is on STOP SALE until further notice. Check for an iN message for further details. Refrain from calling Tech Line for updates.

This bulletin will be updated once Parts Information, Warranty Claim Information, and Repair Procedures are available.

END

CLIENT INFORMATION:The information in this bulletin is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely maintain your vehicle. These procedures should not be attempted by "do-it-yourselfers," and you should not assume this bulletin applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Acura automobile dealer.
