**2ND NOTIFICATION
ACTION REQUIRED!**

This Safety Recall notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. You are being sent this notification because our records indicate you have not had this recall completed.

The reason for this recall:

Indian Motorcycle has determined that some 2017-2018 Scout / Scout Sixty / Scout Bobber models, equipped with Anti-Lock Brakes (ABS), may experience decreased brake performance resulting from the presence of air in the brake circuit. Affected models may have had a small amount of air present in the system, that may cause a soft brake lever / pedal feel and a decrease in brake performance, increasing the risk of a crash.

What you should do:

Contact your authorized Indian Motorcycle dealer to schedule an appointment to have the bulletin repair performed. Do not attempt repairs yourself. Repairs must be done only by an authorized Indian Motorcycle dealer.

What Indian Motorcycle and your dealer will do:

Indian Motorcycle will issue a Safety Bulletin to all Indian Motorcycle dealers, instructing them to bleed the front and rear brake circuits. Repairs will be made by any authorized Indian Motorcycle dealers at no cost to you. The repair should take about thirty minutes to complete.

This notice was mailed to you according to our most current registration information. If you no longer own your Indian motorcycle, please contact your Indian Motorcycle dealer to have ownership information changed.
