WHAT YOU NEED TO KNOW

- **CONDITION** Certain 2012 Model Year Avalon vehicles: Due to a service part manufacturing error, some vehicles may have had a front seatbelt buckle replaced with one that does not correctly identify whether the seatbelt is buckled. **This could affect how the airbag system determines the appropriate airbag deployment method in a crash and could increase the risk of injury to the occupant where the seatbelt buckle was replaced.**
- **REMEDY** Any authorized Toyota dealer will inspect both front seatbelt buckles and, IF NECESSARY, replace them **FREE OF CHARGE.**
- **DURATION** The inspection will take approximately 45 minutes. If it is determined based on the inspection that the seatbelt buckle(s) require(s) replacement, the repair will take approximately one hour. However, depending upon the dealer's work schedule, it may be necessary to make the vehicle available for a longer period of time.

CONDICIÓN Debido a un error de fabricación de la pieza de servicio, es posible que en algunos vehículos se haya reemplazado la hebilla del cinturón de seguridad del asiento delantero por una que no identifica correctamente si el cinturón de seguridad está abrochado. **Esto podría afectar la forma en que el sistema de bolsas de aire determina el método adecuado de despliegue de la bolsa de aire en un choque y podría aumentar el riesgo de lesiones para el ocupante donde se reemplazó la hebilla del cinturón de seguridad.** Llama al **(614) 766-4800** para programar tu reparación **GRATUITA.**
