IMPORTANT SAFETY RECALL

Frame Bracket

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain [2009 – 2012 (DS) RAM 1500 Pickup] vehicles.

WHY DOES MY VEHICLE NEED REPAIRS?

The front fuel tank strap on your truck ^[1] may become loose due to the frame bracket corrosion. With the front fuel tank strap detached, the rear strap primarily secures the fuel tank, however, the front of the fuel tank may be allowed to lower several inches. The vehicle driver may notice a noise, the strap or fuel tank hanging down, frame corrosion, or may be informed during an oil change/state inspection. Detachment of the front fuel tank strap could potentially allow the front of the fuel tank to make contact with the ground, increasing the risk of a fuel leak. **A fuel leak in the presence of an ignition source could result in a fire.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

The parts for this condition are not currently available. We are making every effort to obtain parts as quickly as possible, and will service your vehicle free of charge (parts and labor).

FCA US will contact you again, by mail, with a follow-up recall notice when the parts are available. Once you receive your follow-up notice, simply contact your Chrysler, Jeep®, Dodge or RAM dealer right away to schedule a service appointment ^[2]. Additional options for your next steps are included on the left side of this notification. We appreciate your patience.

WHAT IF I ALREADY PAID TO HAVE THIS REPAIR COMPLETED?

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
