WHAT IS THE REASON FOR THIS NOTICE?

Acura has decided that a defect which relates to motor vehicle safety exists in certain 2017 - 2018 model year NSX vehicles. Due to insufficient welding, the fuel pipe that connects the left and right fuel tanks may separate, resulting in a fuel leak. The consequences of this defect include:

SAFETY CONSEQUENCE

Fuel leakage in the presence of an ignition source increases the risk of a fire.

EMISSION CONSEQUENCE

Fuel leakage will release air pollutants, which may exceed evaporative emissions standards. Your vehicle may fail a state or local emissions inspection if you do not have this recall repair done.

WHAT WILL ACURA DO?

The replacement parts needed to repair your vehicle are not currently available, but are expected to become available in January 2019. Acura will send you another letter when parts are available so you can bring your vehicle in for repair. The dealer will replace the left and right fuel tanks for free.

WHAT SHOULD YOU DO?

We ask for your patience while we prepare replacement parts to repair your vehicle. If you notice a strong fuel smell or fuel leaking from underneath the vehicle, please contact Acura Client Relations immediately at 1-844-682-2872 (NSX specific) for assistance. ***If you are not the only driver of this vehicle, please advise all other drivers and passengers of this important information.***
