

JAGUAR LAND ROVER H081 & N138 FUEL RAIL RECALL PARTS RELEASE UPDATE

PARTS ALERT

09-APR-18

NO.: JA18PA-07
PA18RE-01

SEC.: RECALL

MKT.: CAN / USA

Please be advised that due to Parts Allocation issues, multiple line orders for Recall N138 were rejected on Friday, April 6th, 2018.

On March 12th, Jaguar Land Rover placed and shipped initial parts allocations to all Retailers with sold units to supply available parts urgently. This initial allocation was to be used on customer vehicles ONLY. The initial parts order allocations were 30% based on sold Retailer units for both fuel rails and injector kits.

Due to supply constraints, Retailers were requested to place future orders following the restricted parts order guidelines for each brand using the VIN and quantity 1 fuel rail (JDE40127 & LR114169) and quantity 4 injector kits (T2H33724 & LR105428) per vehicle / per order. Jaguar Land Rover will be temporarily managing restricted parts orders until more supply is available to help maintain parts availability for all retailers and customers.

No calls or emails are required to have orders released. As stock becomes available Jaguar Land Rover will be releasing orders from oldest to newest.

If you have any specific concerns or need additional information, please contact:

- Jaguar Rover Parts Helpline at 888-524-3577 > Option 1
- Land Rover Parts Helpline at 888-577-8577 > Option 1 > Option 1
