

## Questions and answers

### Lamborghini Aventador, Aventador S, Veneno, Centenario, Super Veloce (all models Coupé and Roadster), Aventador J – model year 2012 – 2018

#### “Engine software update”

##### ■ **What is the issue with the affected vehicles?**

Under certain driving conditions (with the accelerator pedal released and below 2000 rpm in conjunction with automatic shifts from high to low gears, in the idle approach) an engine stall event may happen without warning.

##### ■ **What is the cause of this condition?**

The estimation of the fuel flow through the purge valves made by the engine software may lead to an irregularity of the idle with consequent possible engine stall.

##### ■ **What effect does the condition have?**

The engine can switch off at low rpm therefore compromising the servo steering and brake booster functionalities. However, it is still possible to restart the engine after the problem occurrence.

##### ■ **How can the condition be identified?**

No particular customer perception just before the stall.

##### **Is there any risk for the car occupants?**

Automobili Lamborghini S.p.A. is not aware of any accidents or other incidents resulting in injury to a person or damage to property.

##### ■ **Which vehicles are affected ?**
