**Title**

BMW Safety Recall 18V-473: Fuel Level Sensor

**Text**

The fuel level sensor in the fuel tank may contact and become stuck against an in-tank fuel line. If this occurs, the fuel gauge in the instrument cluster would display a constant (and larger) amount of fuel than is actually available. This could lead to stalling, and increase the risk of a crash.

Contact an authorized BMW center immediately to get your vehicle repaired for FREE. Dealer locator: [bmwusa.com/dealer](http://bmwusa.com/dealer).

Advise all drivers of this important information.
