

TOPIC	TYPE	RECALL CODE	QUESTION	ANSWER
Brake Caliper Carrier (Bracket) Bolts	Safety Recall	46H6	What vehicles are included in Safety Recall 46H6?	USA: 2018 MY Atlas & 2017-2018 MY Passat Canada: 2018 MY Atlas & Passat
			What is the safety concern for Safety Recall 46H6?	The brake caliper carrier (bracket) bolts may not be torqued to the correct specification. Because of this, the brake caliper carrier (bracket) may loosen, causing the brake caliper to move on its mount. If this happens, it may lead to increased vehicle stopping distance, may damage a wheel or even cause the vehicle to lose control, increasing the risk of a crash.
			What is the repair for Safety Recall 46H6?	To correct this defect, your authorized Volkswagen dealer will inspect affected brake caliper carrier (bracket) bolts. If a loose bolt is found, it will be replaced and torqued to the correct specification. Additionally, the brake caliper fasteners, bleeder valve and brake hose bolt will be checked and torqued to the correct specification, if necessary. For Passat only dealers will inspect if the parking brake cable is connected properly.
			When will the repair for Safety Recall 46H6 be available?	Repairs can be scheduled with your authorized Volkswagen dealer now. To schedule an appointment, click here .
			Are there any precautions I should take because my vehicle is part of Safety Recall 46H6?	Yes. A rattling noise while driving may occur when the affected brake caliper bolts become loose. If this happens, owners are advised to contact an authorized Volkswagen dealer without delay and arrange to have the vehicle inspected/serviced. Please click here to find a Volkswagen dealer
			How will I know when I can get my vehicle fixed under Safety Recall 46H6?	Volkswagen will send you a letter via first-class mail when the recall repair is available for your vehicle. Until then, if you have any questions or vehicle concerns, please click here to find a Volkswagen dealer or click here to Contact Us.
