AMENDED INFORMATION REPORT (18V- 883)

This supplements Toyota's Part 573 Report (18V-883) concerning the Takata front passenger inflator issue on certain Toyota, Lexus, and Pontiac Vibe vehicles.

Certain early 2002MY Toyota Sequoia vehicles originally included in this recall were not originally equipped with a Takata front passenger inflator. These vehicles were inspected in the original Takata recall (13V-133). Thus, Toyota is amending its Part 573 Report (18V-883) of December 12, 2018 to remove 488 Sequoia vehicles from the affected population.

The production period and the total number of vehicles potentially involved (decreased) are revised as noted below:

Identification of Involved Vehicles:

Make/ Car Line	Model Year	Manufacturer	Production Period
Toyota/Sequoia	2002 - 2005	TMMI	April 3, 2002 through December 21, 2004

Total Number of Vehicles Potentially Involved:

Lexus SC	:	12,718
Toyota Corolla	:	43,038
Toyota Sequoia	:	3,288
Toyota Tundra	:	5,636
Pontiac Vibe	:	104,313
Total	:	168,993
