Chronology :

In August Altec discovered that units may not have been stability tested per ANSI A92.2. Altec investigated the issue and determined that 15 trucks have shipped to customers that were not like other tested units. The designs were analyzed, and all calculations suggest they will pass the ANSI A92.2 test. Altec will follow-up with these units in the field and validate the calculations with the test per ANSI. There have been no reported incidents or injury.
