Description of Defect :

Description of the Defect : Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vehicles, has determined that on certain C-Class (203 platform), CLK-Class (209 platform), E-Class (211 platform) and CLS-Class (219 platform) vehicles, the bonding between the glass panel and the sliding roof frame might not meet specifications.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : In this case, the adhesion of this bonding might deteriorate gradually over time. If the bonding adhesion were to deteriorate, the durability requirements might not be met which could lead to a separation of the glass panel from the vehicle. A displaced panel could increase the risk of a potential crash or injury for other road users.

Description of the Cause : Due to a production deviation at a supplier, glass panels might have been bonded without proper application of the primer (bonding agent). The correct usage of the primer is necessary in order to ensure the specified strength of the bonded joint.

Identification of Any Warning that can Occur : NR

Supplier Identification :**Component Manufacturer**

Name : Webasto Roof & Components SE

Address : Krailing Strasse 5
Stockdorf FOREIGN STATES 82131

Country : Germany

Chronology :

In the beginning of December 2017, MBAG launched initial investigations based on isolated field reports from outside the US claiming that the sliding roof panel detached from the vehicle. No damage or injuries were reported as a result of these events. The sliding roofs of the affected vehicles were requested and returned by the individual markets.

The returned field parts were analyzed by the supplier as well as by an external laboratory. The analysis of the supplier and outside laboratory were inconclusive. Since these analyses did not indicate a potential root cause and this type of sliding roof was already out of production, MBAG began to look for vehicles from the global used car market to carry out further investigations. By November 2018, three sliding roofs were retrieved and analyzed. From these three sliding roofs, two did not indicate any issues, while one of the sliding roof panels exhibited indications of an impaired bonding. It was unclear why the bonding on this particular sliding roof had less adhesion than the other field samples.

MBAG, along with the supplier, also undertook a thorough review of the supplier's production records to determine if there were any changes

Description of Remedy :

Description of Remedy Program : An authorized Mercedes-Benz dealer will check the glass panel bonding on the affected vehicles and replace the sliding roof, as necessary. There are no vehicles affected by this recall campaign covered by MBUSA's new vehicle warranty program.

Customers who have already paid to have this recall condition corrected may be eligible to receive reimbursement. Requests for reimbursement may include parts, labor, fees and taxes. Reimbursement may be limited to the amount the repair would have cost if completed by an authorized Mercedes-Benz dealer.

Identify How/When Recall Condition was Corrected in Production : A review of the supplier's production records reveals that there were changes in its production processes that establish a clean point after August 22, 2006.

Recall Schedule :

Description of Recall Schedule : Dealers will be notified of the pending voluntary recall campaign on December 27, 2019. Owners will be notified of the voluntary recall campaign one week after launch to dealers. A copy of all communications will be provided when available.
