Hanah,

It was a pleasure speaking with you all this morning. As promised, attached is our draft of the 573 that we plan to submit to NHTSA, the draft repair instructions and the unit listing for the universe for the recall. As mentioned on the call this morning, none of the repairs have been completed on the inspected units whether they passed our inspection or not. We're recommending that all units included in the universe have the additional angle added.

On the 573, could you please let me know the Brand/Trade and Model associate with this recall?

Please review and let me know if you have any questions regarding any of this. I look forward to speaking with you tomorrow at 9:30.
