#### Front Brake Hose

A delivery stop and recall is being announced for 2013-2019 C 600 Sport, C 650 Sport and C 650 GT scooters produced between Aug 2012 and Aug 2018.

This Safety Recall involves the front brake hose. Over time, and after repeated cycling of the handlebars to the maximum left position, such as when locking the handlebars, or during very tight maneuvers, the hose could become damaged. After additional cycling of the handlebars to this position, the hose could develop a leak. The repair will involve replacing the front brake hose with an improved part, however parts are not expected to be available until early June 2019.

Affected scooters will be marked in AIR and DCSNet. New/used scooters in dealer inventory as described above cannot be sold until they are repaired. Existing customer will be informed of the recall by US Mail in the next 60 days. Further customer questions should be directed to the BMW Customer Relations at 1-800-831-1117.

Additional information will be posted on Dealer Direct as it becomes available.
