Date: June 10, 2019

Issue:
The headlights are not permitted to have a horizontal adjustment for vehicles certified according to regulatory requirements. The horizontal adjuster is blocked from further adjustment by means of a cap (after the initial adjustment is performed in the production process). Some vehicles did not have the required cap installed. Incorrectly adjusted headlights may result in reduced visibility (for the driver and other motorists) which could increase the risk of a crash.

Repair:
- REPAIR AVAILABLE – June 11, 2019 – Inspect and, if necessary install missing headlight adjusting screw caps
- See ELSA/ServiceNet for complete repair & claiming instructions
- Check both the daily Campaign Open Inventory report and OMD for affected vehicles in inventory. Verify OPEN status in ELSA on the day of repair.
- Repair every affected inventory vehicle before delivery to consumers.

- Initial Allocation: YES
  - Dealers will be sent an initial allocation prior to customer notification. If no initial allocation was received, please reference the Repair Projection Tool to view your potential VIN population.
