## **New Safety Recall Advanced Communication – V67**

FCA US LLC (FCA US) has announced a safety recall on certain 2019 Model Year RAM 1500 Pickup vehicles.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may have been equipped with a spare tire different than the spare tire size and cold inflation pressure designated on the tire placard label. A driver may rely on the incorrect spare tire inflation pressure on the tire placard label and inflate the spare tire to an incorrect pressure resulting in potentially degraded vehicle performance, which can cause vehicle crash without prior warning.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 110 S4.3 which requires that each vehicle shall show recommended cold tire inflation pressure for front, rear and spare tires, for full size spare tires, tire size designation, and the tires installed at the time of the first purchase for purposes other than resale.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall to replace the spare tire with the correct tire. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2019.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
