Advance Notice - Safety Recall 74D9 / Passenger Occupant Detection System (PODS)

This notice is for: Date:	✓ Genera✓ Sales M	Principal ✓ I Manager ✓ Ianagers ✓	 ✓ Service Manager ✓ Parts Manager ✓ Service Advisor 	Warranty Administrator Technicians		
Date.	July 31, 2019					
Issue:	The self-diagnosis of the passenger occupant detection system (PODS) connecting cable is too sensitive in case of a partial surface oxidation of the electrical shielding inside the cable harness. This may cause the PODS to detect a malfunction and switch off the passenger airbag even though the seat may be occupied.					
Precautions	As designed, a warning light in the instrument panel comes on together with an acoustic warning sound and an error message is displayed in the instrument cluster. The airbag indicator light shows "passenger airbag off". If this happens, customers are advised to contact an authorized Audi dealer to have the vehicle inspected/repaired without delay.					
Repair:	 REPAIR NOT YET AVAILABLE Check daily campaign open inventory report or OMD for affected vehicles in inventory Repair every affected inventory vehicle <u>before delivery to consumers</u>.
