

Delivery Stop

Stop Sale G310 GS (K02), G 310 R (K03) and C 400 X (K09)

Brake Caliper

BMW Motorrad is announcing a delivery stop for all G 310 GS (K02), G 310 R (K03) and C 400 X (K09) motorbikes due to a concern with corrosion on the front and rear brake calipers. Units currently in dealer and BMW inventory will remain on the stop sale until parts are available. An adjustment to cover excess dealer floorplan expenses incurred due to this situation will be determined and communicated consistent with previous recall situations in the coming weeks.

For customers with existing units, an inspection process through the dealer will be made available until replacement parts are in-stock for a final repair. Customers will be informed of this process through a letter from BMW Motorrad USA late September. Repair instructions and parts for the final remedy are currently being developed and further information will be available early to mid-September.
