Subject: **BMW Delivery Stop & Recall 19V-684: Program Control Units (Rearview Camera) - UPDATE**

Hello everyone,

There has been an update to the VIN list for Recall Campaign 19V-684 Program Control Units (Rearview Camera).

Approximately 250,000 vehicles are now affected by this recall.

- Vehicles produced prior to May 1, 2018 have been removed.
- Approx. 100,000 vehicles produced after May 1, 2018 have been added.

Three important things to note:

1. **Software remains available and no parts are needed.**
2. With this change, the remedy status has been reset but **please move forward regardless of the remedy status.**
3. It may show up with **STOP014027 AND 0066350100**. It is only one campaign and not two campaigns. It will fix itself by tomorrow - please ignore.

Please see attached bulletin for repair. There will be a revised bulletin published this week with Warranty information, updated Recall Notice and Q&A. The repair instructions do not change.

Sincerely,
Technical Service
