NHTSA RECALL 19V-316

Dear Altima Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that certain 2019 Model Year Nissan Altima vehicles fail to comply with the requirements of Federal Motor Vehicle Standard (FMVSS) number 301, "Fuel Tank Integrity." Our records indicate that you own or lease the Nissan vehicle identified by the VIN on the inside of this notice.

Reason for Recall
Motivo del Retiro

Your vehicle's fuel tank is equipped with a fuel pump that may not have been installed correctly during production. More specifically, the fuel pump lock ring may not be completely locked into position. If the lock ring is not fully engaged, the condition could result in a fuel odor, rattle noise, Malfunction Indication Lamp (MIL) illumination and/or fuel leakage. If a fuel leak were to occur, it could increase the risk of a fire if exposed to an ignition source.

What Nissan Will Do
Qué Hará Nissan

Owners of all potentially affected vehicles are being notified to take their vehicle to a Nissan dealer where the dealer will inspect the fuel tank assembly. If the fuel pump lock ring is partially locked, the dealer will tighten it to specification. If the lock ring is completely detached, the dealer will replace the fuel pump and seal. This free service should take less than one (1) hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.
