**NHTSA RECALL 19V-495**

Dear Titan Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2017-2019 Nissan Titan vehicles. Our records indicate that you own or lease the Nissan vehicle subject to this recall as identified by the VIN on the inside of this notice.

**Reason for Recall**  
**Motivo del Retiro**

On certain vehicles, the alternator harness may have been damaged during installation. As a result, an electrical short may occur and may cause abnormal electrical activity. This condition may prevent the battery from charging, and over time, lead the battery to discharge. At low battery voltage, the vehicle's electrical components may flicker and turn off. The vehicle will operate at reduced power and if the condition worsens, an engine stall may occur while driving. The electrical short may lead to a fire.

**What Nissan Will Do**  
**Qué Hará Nissan**

Your Nissan dealer will inspect your alternator harness for damage. If your vehicle is affected, the harness will be replaced with a new one. This free service should take up to two (2) hours to complete if the alternator harness needs replacement, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

**What You Should Do**  
**Qué Debes Hacer**

Contact any Nissan dealer at your earliest convenience to schedule an appointment to have your vehicle remedied. Please bring this notice with you to your service appointment. If you paid to have your alternator harness replaced due to damage prior to this campaign, you may be eligible for reimbursement of the related expense.
