Re: 19V-545

To NHTSA Recalls Management Division:

This recall involves a population of 2 vehicles which were equipped with owner's manuals that did not meet the vehicle's features and operating instructions for the vehicle. Please be advised that both of the affected vehicles were identified at Daimler Vans' Vehicle Production Center (VPC). The vehicles were not delivered to DVUSA dealers or end users and no dealer or customer notification letters are necessary.

Thank you,

A handwritten signature in cursive script that reads "Antonio Mole".

Antonio Mole
