IMPORTANT SAFETY RECALL

Fuel Pump Relay

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA US has decided that a defect, which relates to motor vehicle safety, exists in certain [2011 – 2013 (WD) Dodge Durango, and 2011 – 2013 (WK) Jeep Grand Cherokee] vehicles.

It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

WHY DOES MY VEHICLE NEED REPAIRS?

Our records indicate that your vehicle ^[1] was included in previous Safety Recall P54 (NHTSA 14V-530) or Safety Recall R09 (NHTSA 15V-115). The remedy for the previous recalls was to replace the fuel pump relay. If you had either of these recalls completed, the installed remedy relay is susceptible to silicon contamination on the relay contacts, which can cause the relay to fail. A fuel pump relay failure can result in a no-start condition or an engine stall condition if the vehicle is running. **A vehicle engine stall while driving can cause a vehicle crash without prior warning.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will replace the affected fuel pump relay and related wire harness. For vehicles that have not been serviced for recall P54 or R09, a new externally mounted relay and wire harness will be installed to bypass the fuel pump relay that is internal to the totally integrated power module. For vehicles that have already been serviced for recall P54 or R09, the existing externally mounted fuel pump relay and wire harness will be replaced with a new relay and wire harness. The estimated repair time is about one hour. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
