## IV. BACKGROUND

Pursuant to FMVSS 110 S10, a load carrying capacity modification label must be added to a vehicle if weight exceeding the lesser of 1.5 percent of GVWR or 45.4 kg (100 pounds) is added to a vehicle between final vehicle certification and the first retail sale of the vehicle, and the corrected values must be accurate to within 1 percent of the actual added weight. With regard to the vehicles that are subject to this recall, SET added net accessory weight and provided the requisite load carrying capacity modification label, but SET has determined that certain labels were not accurate to within 1 percent of the actual added weight.

## V. COMPONENTS

SET Accessory weight label

## VI. WORK PROCEDURE

- Install SET accessory weight label **OVER** the existing label, as shown in the image above.

**You must affix the enclosed Load Carrying Capacity Modification Label to the appropriate vehicle (check the VIN to make sure it matches the label). Please clean the labels currently installed on the vehicle with a clean, dry cloth and then affix the new label on top of the current label.**
