### THE REMEDY IS NOW AVAILABLE

July 3, 2019

Dear Kia Sportage Owner:

**Kia has identified a defect in your vehicle which relates to motor vehicle safety.**

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Kia Motors has decided that a defect which relates to motor vehicle safety exists in certain 2011-2012 MY Kia Sportage vehicles. The defect may cause oil to leak from the oil pan. If a vehicle is continued to be driven with an unrepaired oil leak, damage to the engine can occur and the vehicle could stall while in motion. An engine stall can increase the risk of a crash. There is also a possibility that a fire could occur, increasing the risk of injury. You were previously advised that Kia was working on a repair remedy for this defect. **The remedy to repair your vehicle is now available.**

### What Is The Problem?

The oil pan may have been improperly sealed during engine production. As a result, if the vehicle is continued to be driven with an oil leak, damage to the engine can occur and the vehicle could stall while in motion, increasing the risk of a crash. There is also the possibility that a fire can occur, increasing the risk of injury.

Please note that the following warnings may identify that the above condition is present. These include 1) oil on the ground after the vehicle is parked, 2) oil on underbody surfaces of the vehicle, 3) smell and/or smoke associated with oil on hot

surfaces, 4) the illumination of the Check Engine (Malfunction Indicator) Light  and/or the Engine Oil Pressure Warning Light in the Instrument Panel; and 5) reduced power/hesitation.

**Kia Will Replace the Oil Pressure Switch, and, if an Oil Leak is Detected, Will Replace the Oil Pan at No Cost for Parts and Labor to You.**

Kia has advised its authorized dealers to replace the Oil Pressure Switch (OPS) with an improved one that will detect the early onset of oil leaking. In addition, dealers will inspect the oil pan for any oil leaks. If an oil leak is found, the oil pan will be replaced at no cost for parts or labor to you.

### **What Should You Do?**

- In the interest of the safety of your passengers, as well as your own safety, please immediately contact your Kia dealer to arrange for the recall repair to be conducted. The estimated time required to inspect and perform necessary repairs will be approximately two (2) to three (3) hours.
