### IMPORTANT SAFETY RECALL

(NHTSA Recall Number: 19V120)

This notice applies to your vehicle: **(Insert VIN)**

April 12, 2019

Dear Kia Soul Owner:

**Kia has identified a defect in your vehicle which relates to motor vehicle safety.**

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Kia Motors has decided that a defect which relates to motor vehicle safety exists in the 2012-2016 MY Kia Soul vehicles equipped with the 1.6L Gasoline Direct Injection (GDI) engine. The defect may cause damage to the catalytic converter due to overheating, resulting in abnormal engine combustion and damage to the engine pistons. Piston damage can result in a stall, increasing the risk of a crash. If a piston rod breaks and punctures the engine block, oil can escape, increasing the risk of a fire.

### What Is The Problem?

Under certain conditions, the catalytic converter may become damaged due to overheating caused by an excessive increase of exhaust gas temperatures. If the catalytic converter is damaged, substrate particles can

enter the engine combustion chamber and cause abnormal engine combustion. Continuous abnormal engine combustion can result in damage to one or more of the engine's pistons which can cause piston rod breakage, potentially puncturing the engine block allowing engine oil to escape and potentially contact a hot exhaust surface. These conditions can increase the risk of an engine stall or fire.

**If this condition occurs, you may hear knocking noise from the engine and/or the Malfunction Indicator Lamp (MIL)  may illuminate.**

**Kia Will Upgrade the Catalytic Overheating Protection (COP) logic in the Engine Control Unit (ECU) and If Necessary Replace the Catalytic Converter and/or Engine at No Cost to You.**

Kia has advised its authorized dealers to upgrade the COP ECU logic to prevent overheating of the catalytic converter. The catalytic converter will also be replaced if it has been damaged. Depending on the extent of any damage, the engine may also be replaced. This work will be performed at Kia's expense at no cost to you. The time required to upgrade the COP ECU logic is approximately one (1) hour. Note that if the catalytic converter and/or the engine need to be replaced, additional time to complete the repair will be necessary. We recommend that you contact the dealer for an estimate of how long they may need the vehicle and schedule a service appointment to minimize inconvenience.

### **What Should You Do?**

- In the interest of the safety of your passengers, as well as your own safety, please immediately contact your Kia dealer to arrange for the recall repair to be conducted.
- To find your nearest dealer, visit [www.kia.com](http://www.kia.com) and click the "Find Dealer" button in the upper right corner ("Dealers" on a mobile device).
