Honda is amending Defect Information Report (DIR) 19V-501 to remove 61 vehicles from the affected vehicle population based on additional analysis performed after the DIR filed on June 27, 2019. Honda confirmed that certain affected vehicles either i) have associated warranty records indicating that a passenger frontal airbag inflator from an alternative manufacturer was installed during a previous recall repair, or ii) that a preceding passenger frontal airbag inflator recall is still open on the vehicle and are already accounted for in the preceding recall. This amendment impacts the following reporting categories:

1. Identification of potentially affected vehicles; and
2. Total number of potentially affected vehicles.

573.6(c)(2)

Identification of potentially affected vehicles:

<u>Make/Model</u>	<u>Description</u>	<u>Number of Vehicles in Initial Report</u>		<u>Number of Vehicles in Amended Report</u>
Honda Accord	Certain 2003 model year	140,921	→	140,864
Honda Odyssey	Certain 2003 model year	66,184	→	66,180

573.6(c)(3)

Total number of potentially affected vehicles:

1,657,813 (original population)
- 61 (population reduction)
<u>1,657,752 (amended population)</u>
