**Description of the basis for the determination of the recall population:**

According to the May 4, 2016 Amendment to the November 3, 2015 Consent Order, the fifth phase of the Takata DIRs that affect the subject vehicles (Priority Groups 11-12) are not scheduled until late 2019. However, in consideration of a sufficient supply of final remedy inflators, and upon consultation with the NHTSA, Honda is further accelerating the launch of the remedy for these vehicles ahead of the late 2019 scheduled Takata DIRs.

The recall population was determined based on dealership warranty, repair order, and service parts records. The production range reflects all possible vehicles that could potentially experience the problem.

**Description of how the vehicles being recalled differ from similar vehicles not included in the recall:**

This recall is specific to vehicles that received a PSPI-6 passenger frontal airbag inflator either as a recall remedy part or as a replacement service part (replacement passenger frontal airbag module containing a PSPI-6 inflator). Similar vehicles not included in this recall either were repaired with a passenger frontal airbag inflator from an alternative manufacturer, or are currently subject to an open passenger frontal airbag inflator recall.

**Identification of affected component:**

573.6(c)(3)

**Total number of potentially affected vehicles:** 9,566

573.6(c)(4)

**Percentage of affected vehicles that contain the defect:** 100%

573.6(c)(5)

**Defect description:**

According to the May 4, 2016 Amendment to the November 3, 2015 Consent Order, Takata agreed to conduct recalls on a rolling basis for a defect in all driver and passenger inflators that contain a PSAN-based propellant, and do not contain a moisture-absorbing desiccant. Specifically, a defect related to motor vehicle safety may arise in some of the subject non-desiccated PSAN inflators due to propellant degradation occurring after prolonged exposure to high absolute humidity, high temperatures, and high temperature cycling. Activation of a non-desiccated PSAN inflator with degraded propellant may result in an inflator rupture. An inflator rupture may cause metal fragments to pass through the air bag and into the vehicle interior at high speed, which may result in injury or death to vehicle occupants.

573.6(c)(6)

**Chronology:**

May 29, 2019

In consideration of a sufficient supply of final remedy inflators, Honda consulted with the NHTSA about advancing the recall launch of Priority Groups 11-12 vehicles.

June 20, 2019

Honda determined that a defect related to motor vehicle safety existed and decided to conduct a safety recall ahead of the fifth phase of the Takata DIRs scheduled for late 2019.

573.6(c)(8)(i)

**Program for remedying the defect:**

The owners of all affected vehicles will be contacted by mail and asked to take their vehicle to an Acura or Honda automobile dealer. The dealer will replace the passenger frontal airbag inflator with a new inflator, free of charge.

573.6(c)(8)(ii)

**The estimated date to start notification to dealers:** June 28, 2019

**The estimated date to start notifications to owners:** August 12, 2019

573.6(c)(9)

**Representative copies of all notices, bulletins and other communications:**

A copy of the dealer service bulletin, the final customer notification letter and other dealer communication will be submitted to your office as soon as possible.

573.6(c)(10)

**Proposed owner notification letter submission:**

A draft of the owner notification letter will be submitted to your office as soon as possible.
