AMENDED INFORMATION REPORT (19V-627)

This supplements Toyota's Part 573 Report (19V-627) concerning the front passenger air bag assembly issue on certain Toyota and Pontiac Vibe vehicles.

The subject recall only affects certain Toyota and Pontiac vehicles equipped with specific Takata front passenger air bag assemblies which contain an alternative air bag inflator produced by a different supplier and that were used as a replacement under a prior recall. After the DIR filing on August 28, 2019, Toyota and GM identified additional vehicles that may have been equipped with the subject front passenger air bag assemblies. Thus, Toyota is amending its Part 573 Report (19V-627) of December 13, 2019 to add 10,215 Toyota and 859 Pontiac Vibe vehicles to the affected population.

The production period and the total number of vehicles potentially involved (increase) are revised as noted below:

Identification of Involved Vehicles:

Make/ Car Line	Model Year	Manufacturer	Production Period
Toyota/ Corolla	2003 - 2008	TMC, TMMC, NUMMI	January 4, 2002 through December 20, 2007
Toyota/ Corolla Matrix	2005 - 2008	TMMC	April 25, 2004 through December 18, 2007
Pontiac/ Vibe	2005 - 2008	NUMMI	April 26, 2004 through January 2, 2008

Total Number of Vehicles Potentially Involved (revised):

Toyota Corolla : 23,195
Toyota Corolla Matrix : 121,679
Pontiac Vibe : 84,586
Total : 229,460
