

Parts Update for Recall 19V-692: K48/K61 (K 1600 B, GT, GTL)

As parts continue to arrive at a steady pace effective **Monday March 2, 2020** dealers may now order kits for **urgent cases** (ex. customer escalation, sold unit) through the regular DMS/DCS ordering processes under part number 81925A1BB87 (defect code 0000232300). Orders can be placed via regular stock order or VOR. Please note that VOR orders will take priority but the VOR fee will not be reimbursed. If you require parts for a bike that requires repairs under defect code 00002324000 please continue to place IDS tickets as previously instructed.

All IDS tickets received until this point will be processed and do not need to be reordered.

Please note: The PO number of each order must reflect the VIN it will be used for. Orders that are for a quantity of more than 1 and which do not have a valid VIN as the PO number may be canceled. This process will remain in place until enough inventory arrives for parts to be opened up for standard dealer ordering.
