Chronology :

In mid-February, 2020, based upon an internal review of motorcycle accessory parts, BMW became aware that certain motorcycles produced for the US market (with an order option for a color-specific brake fluid reservoir cover) could have been released with a cover that may not fully conform to FMVSS 122 Section 5.1.9(d).

A review of regulatory requirements, and the language contained on the covers, confirmed that potentially affected motorcycles may not fully conform to FMVSS 122 Section 5.1.9(d). Motorcycle production records were reviewed to determine the number, and production date range, of potentially affected motorcycles.

BMW has not received any reports, nor is BMW otherwise aware, of any accidents or injuries related to this issue.

On March 12, 2020, BMW decided to conduct a voluntary non-compliance recall.

Description of Remedy :

Description of Remedy Program : The brake fluid reservoir cover will be replaced.

Owners will be notified by First Class mail and instructed to take their motorcycle to an authorized BMW motorcycle dealer to have the remedy performed for free. If this condition were to occur to a potentially affected motorcycle prior to this recall, the remedy would be covered by the BMW Motorcycle New Vehicle Limited Warranty program. Therefore, reimbursement for a pre-notification remedy re Part 573.13 and Part 577.11 is not necessary.
