Description of Defect :

Description of the Defect : As Per Dometic's recall 20E071 - The defect enunciation can occur in a mobile environment, such as a recreational vehicle or marine vessel, when, generally after an install or usage period of 3-6 months, the installer, occupant, or user of the appliance smells gas and apparently attempts to tighten the securement bolts that hold one or more of the stove saddle valves in place and sealed to the manifold. This action may result in the overtightening of the securement bolt for the saddle valve which may cause damage to the O-ring seal between the saddle valve and the manifold resulting in a continuous gas leak that is readily detectable from the smell.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : The overtightening of the saddle valve securement bolt onto the manifold of the stove may cause a gas leak which may ignite and cause a fire. Dometic has had one instance of ignition and damage to the piezo igniter and one control knob, although the ignition was contained within the stove enclosure. There has been no damage to adjacent or surrounding combustible materials. A gas leak can lead to the risk of fire, property damage, injury, or possible death.

Description of the Cause : Dometic has not determined the cause of these leaks but is continuing to gather facts on the potential defect and will forward additional relevant information as it becomes available.

Identification of Any Warning that can Occur : The smell gas fumes are indicative of the identified leak.

Chronology :

On November 9, 2020, Forest River's Office of Corporate Compliance ("OCC") reviewed NHTSA's weekly recall alert email and found that a recall from another recreational vehicle manufacturer had been filed in conjunction with Dometic recall 20E071. The same day, OCC sent a request for more information to Dometic to ascertain if any Forest River manufacturing plants are affected by Dometics recall.

On November 12, 2020, OCC sent an email request to all purchasing agents within Forest River to try and find if any manufacturing division used the Dometic recalled stoves/cooktops.

On November 13, 2020, OCC sent another request to Dometic to find out if any Forest River manufacturing plants are affected by the Dometic recall. OCC received a response the same day with sales records from Dometic.

On November 16, 2020, OCC contacted Dometic to clarify the report delivery dates that was given to OCC, such as the delivery dates and certain manufacturing delivery locations.

On November 17, 2020, OCC received clarification to the report delivery dates and began to identify those vehicles involved at the known manufacturing plants. OCC is still working with Dometic to identify deliveries in which Dometic cannot assign a physical address, which means OCC does not know which manufacturing plant (s) other than what is recalled, is affected. At this time, Dometic is working to supply OCC with this information.

On November 19, 2020, OCC received via USPS Mail formal notification to Forest River of Dometic Recall 20E071. OCC is still trying to identify other manufacturing plants received the subject stoves/cooktops.

On November 23, 2020, Forest River filed the recall with NHTSA and Trans Canada

Amendment 1 - On November 25, 2020, Forest River received information from Dometic and Forest Rivers Office of Corporate Compliance was able to identify all vehicles affected. We also located the recall amended on safecar.gov. with remedy from Dometic. Filed amendment with NHTSA and Trans Canada

Description of Remedy :

Description of Remedy Program : Dometic has NOT yet identified a proposed remedy or remedies designed to mitigate the defect but will advise NHTSA of such remedy or remedies at the time they are identified. Dometic will further initiate a remedy campaign on the R1731, R21231 and S31 recreational vehicle stoves and will participate in remedy campaigns for the R1731, R2131 and S31
Amendment 1 As per Dometic recall 20E071 - The remedy consists of gaskets, washers, thread locker bolts, two round, orange, labels that are to be applied to the product and to the packaging(if the product has not been installed), as well as a set of complete instructions describing who is authorized to make the remedy and how the remedy is to be made followed by a leak test as defined in the instructions.
