**TO:** Micro Bird Distributors  
**SUBJECT:** Recall # 19-083-BUS/NHTSA #20V005  
**FROM:** Marie Claude Gagnon, Product Certification and Specifications Specialist, Micro Bird Inc.

---

This notice is sent to you in accordance with the *National Traffic and Motor Vehicle Safety Act*.

**What is being recalled?**

Micro Bird has decided that a defect which relates to motor vehicle safety exists in certain T-Series models, built on Ford Transit chassis, year models 2015-2019 buses manufactured between September 11, 2014 and December 15, 2019 and equipped with a 150A Breaker.

**Why is it being recalled?**

Micro Bird has determined that the currently installed 150A breaker, located under the driver's seat, is oversized in relation to the maximum ampacity of the secondary wires connecting the fuse boxes in the electrical panel over the driver's seat.

**What is the safety issue?**

Under infrequent sustained overload conditions, the 150A breaker, located under the driver's seat, may not open fast enough to power off the electrical panel supply. This situation might generate overheating of the secondary wires. If the wires overheat, there is an increased risk of a fire.
