Optional Attendees: Olson, Jim; Ries, Craig; Hegstrom, Jeff

Good afternoon,

DO NOT DISSEMINATE TO END CUSTOMERS! Any dissemination to affected owners can result in **\$15,000 fine per unit**. If contacted about this notice, you can speak with the customers about the issue but can't supply them with any other information.

On Tuesday, May 12th, we'll be hosting a conference call to release Safety Notice 685. This address the need to install bullseye bubble levels on TL80 and TL80/112 aerials. NHTSA has assigned their number 20V240 to this bulletin. I've attached the SN685 bulletin, Z1587 FSK bill of material, work instruction, SN685 work completion form, and list of affected units for review. There are two different work completion forms. One is for N. American customers and the other is for international customers only. The projected owner letter mailing date is also May 12th.

The conference call information is listed below with the call slated for 9:45-10:00am. This call will include our distribution network.
