Subject: **Important Update - Shipping has resumed PHEV Modules for 20V-601, Bulletin B61 23 20**

Please read the below update regarding the PHEV Modules:

- **As of Friday, February 12th the PHEV Modules (all part numbers) are currently shipping again from KemKrest.**
- **Please note there is currently a backlog for all orders with an open Sales Order Number. We expect to have all current orders with Sales Orders numbers shipped within the next 10 days barring any weather delays. Newer orders will then start to ship after the backlog is cleared.**
- If you have sent an IDS ticket your order is in the queue, please do not resend your request.
- Please ensure you review the bulletin and claim test plan using the temporary defect code, do not claim the complete repair until the modules have been replaced.
- The test plan can be done via Mobile Service so the customer does not have to visit the dealership twice.
- Or bring the vehicle in for the test plan, release the vehicle and schedule an appointment once all parts have arrived for the repair.
- Do not start work on the vehicle until you have all necessary parts including the modules.
- Please read the weekly Parts Matrix for additional information.

Thank you,
Technical Service
