DCSnet Message  
**Important**

Subject: **Recall 20V-601 Battery Orders**

Attention Parts Manager:

For the ongoing 20V-601 recall please note that batteries must be ordered by the recall part number ONLY.

EPC          Recall  
8658344 = 8843411  
8658345 = 8843412  
8678566 = 8843413  
8678567 = 8843414

There are currently many backorders on the EPC part numbers and limited inventory for these modules are expected to arrive in the coming weeks. These EPC batteries are needed for customer pay and warranty vehicles.

Any orders for these EPC part numbers will be processed but are not eligible for the technical campaign. Performing a part number look-up in ETK (EPC) by VIN or model in place of using/invoicing the EPC part numbers may result with the wrong part numbers being invoiced and installed, this could delay the payment of the claim.

NOTE: An EPC battery part ordered by mistake is not returnable so please contact to cancel any unintentional orders.

For more information, please reference the appropriate SIB:
