SITUATION

BMW AG is conducting a Voluntary Safety Recall (effective February 12, 2021) on a small number of Model Year 2021 BMW vehicles that were produced between September 9, 2020 and January 13, 2021.

This is an expansion of recall 20V-761 that was launched in early December 2020.

The 48-Volt battery cable connections to the starter / generator may not have been assembled to specifications. Over time, this could lead to increased resistance at the connection(s) and, in rare cases, a thermal event.

The Recall Notice has been attached for further information.

The bulletin will be updated when additional information becomes available.

SAFETY RECALL NOTICE

To: All Center Operators, Sales Managers, Service Manager, Parts Manager and Warranty Processor

RE: Safety Recall: 48-Volt Battery Connections – B12 01 21

BMW AG is conducting a Voluntary Safety Recall (effective February 12, 2021) on a small number of Model Year 2021 BMW vehicles that were produced between September 9, 2020 and January 13, 2021.

Please be reminded that it is a violation of federal law (The Safety Act) for you to sell, lease or deliver any new motor vehicle covered by this notification until the recall repair has been performed. This means that centers may not legally deliver new motor vehicles to consumers until they are fixed or use/sell replacement equipment/parts subject to this recall. Note also that substantial civil penalties apply to violations of the Safety Act.

Also, you should not sell, lease or deliver any Certified Pre-Owned or used vehicles subject to a safety recall until the repair is completed.

Please follow any special instructions that we provide to you for the return or disposition of recall parts.

We appreciate all your assistance with this Recall.
