What is the issue? The driver's seat frame may not have been bolted to the seat rail correctly. In the event of a crash, the bolted connection could possibly fail, leading to an increased risk of injury in a crash.

What will we do? To correct this defect, your authorized Audi dealer will inspect the driver's seat bolt torque and, if necessary, replace the seat frame. This work will take about an hour to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.

What should you do? Please contact your authorized Audi dealer without delay to schedule this recall repair. For your convenience, you can also visit www.audiusa.com and click on the "Find a Dealer" link to locate a dealer near you and schedule this service.

Precautions you should take If this recall condition is present in the vehicle, the driver may notice that the driver's seat wobbles while the vehicle is in motion. Should this occur, owners are advised to contact an authorized Audi dealer without delay to have the vehicle inspected/repared.
