This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

**Our records indicate  
YOUR UNIT HAS NOT BEEN  
REMEDIED.  
Please **DO NOT** ignore this notice!**

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2020 Springdale Travel Trailers. As a result, Keystone RV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for  
this recall***

It has been decided that vehicles in this population have 4400 pound axles and ST255/75R15D tires and rims rather than the 5200 pound axles and ST255/75R15E tires and rims as specified on the Federal Identification Tag. Incorrectly installed axles, tires, and rims can be unintentionally overloaded which may lead to an increased risk of a crash.

***What we  
will do***

Keystone representatives have been in contact with the staff at your selling dealership regarding this situation. The remedy is to replace the 4400 pound axles, ST225/75R15D tires, and rims with 5200 pound axles, ST225/75R15E tires, and rims. The service and parts required for this corrective action will be provided at no charge to you.

***What we  
need you to  
do***

Vehicles should be unloaded and returned to an authorized Keystone dealer for repairs. As soon as possible, please make an appointment to have your RV serviced by your dealership. The labor time to perform this correction is approximately 3 hours. Please ask your dealer if you wish to know how much additional time will be needed to schedule and process your RV for this repair.

**BE ADVISED –  
Damage caused by failure to have the  
recall remedy completed will be the  
responsibility of the owner.**
