## IMPORTANT SAFETY RECALL

(NHTSA Recall Number: 20V-459)  
This notice applies to your vehicle: **(Insert VIN)**

September 2, 2020

Dear Kia Forte Owner:

### **Kia has identified a defect in your vehicle that relates to motor vehicle safety**

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Kia Motors has decided that a defect that relates to motor vehicle safety exists in certain 2019 MY Kia Forte vehicles. The defect can cause the vehicle's driveshaft to break, resulting in a sudden loss of drive power, increasing the risk of a crash. Our records indicate that you own or lease one of the potentially affected vehicles.

### **What Is The Problem?**

The left front axle driveshaft may not have been heat-treated due to a supplier error. A driveshaft that has not been heat-treated is more susceptible to breaking. A broken driveshaft can result in a sudden loss of drive power, increasing the risk of a crash.

### **Kia Will Inspect, And If Necessary, Replace the Left Front Axle Driveshaft Free Of Charge At No Cost For Parts Or Labor To You.**

Kia has advised its authorized Kia dealers to inspect the left front axle driveshaft for a heat treatment verification code. If the heat treatment verification code is missing, the driveshaft will be replaced with a new one. The repair work will be performed at Kia's expense at no cost to you. The estimated time required to repair your vehicle is approximately 1-2 hours. However, your vehicle may be needed longer; therefore, we recommend scheduling a service appointment to minimize any inconvenience.

### **What Should You Do?**

- **If you hear a loud noise coming from the front wheel area and/or experience a loss of drive power, please immediately stop driving your vehicle and contact Kia Roadside Assistance at 800-333-4Kia (4542) to request that your vehicle be towed to the nearest Kia dealer for inspection and repair as soon as possible.**
