IMPORTANT SAFETY RECALL

(NHTSA Recall Number: 20V750)
This notice applies to your vehicle: **(Insert VIN)**

January 25, 2021

Dear Kia Soul Owner:

Kia has identified a defect in your vehicle which relates to motor vehicle safety.

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Kia Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2014-2015 MY Soul vehicles. The defect can result in an engine compartment fire while driving, thus increasing the risk of injury. Our records indicate that you own or lease one of the potentially affected vehicles.

What Is The Problem?

Kia has identified some vehicles that have experienced an engine compartment fire. To date, a cause of such fires due to a manufacturing or design defect has not been identified. Since an engine compartment fire while driving can occur for many different reasons, Kia is conducting this recall to mitigate any unreasonable fire risk due to potential fuel leaking, oil leaking and/or engine damage.

NOTE: Depending on the condition of your vehicle's engine, engine noise, illumination of Malfunction Indicator Light (MIL)

that may be related to an engine mechanical issue, illumination of Engine Oil Pressure Warning Light

fuel smell,

burning smell, oil leaking, and/or smoke from the engine compartment can occur. An engine compartment fire increases the risk of injury.

Kia Will Inspect, Test, And If Necessary, Repair or Replace The Engine, At No Cost To You.

Kia has advised its authorized Kia dealers to conduct an inspection of the engine compartment for any fuel and/or engine oil leaks. Dealers will also perform an engine test, and make any repairs, including engine replacement, if necessary.

In addition, dealers will also perform a Knock Sensor Detection System (KSDS) software update to the engine control unit (ECU) in your vehicle to prevent engine damage due to potential excessive connecting rod bearing wear. Upon completion of the KSDS software update, Kia will warrant any engine long block assembly repairs needed due to connecting rod bearing damage for 15 years/150,000 miles starting from the first date of service, whichever occurs first, for both new and used vehicle owners.

NOTE: Your vehicle may have already received the KSDS software update previously announced by Kia in late August 2020. As part of that product improvement campaign, Kia advised it would extend the warranty coverage for the engine sub-assembly (short block) to 10 years starting from the date of first service or 120,000 miles, whichever occurs first for both new and used vehicle owners for excessive connecting rod bearing wear. That coverage is therefore being increased to 15 years/150,000 miles as part of this recall.

The estimated time required to complete the repair will be 2 to 4 hours, depending on your dealer's schedule. We recommend that you contact your local Kia dealer to schedule a service appointment by phone or online to minimize inconvenience.

What Should You Do?

- If your vehicle displays any of the warning lights listed above, and/or if you notice a fuel smell, a burning/melting odor or smoke coming from the engine compartment, please contact Kia Roadside Assistance at 1-800-333-4542 (4Kia) to request to have your vehicle towed to the closest authorized Kia dealership.
