AMENDED DEFECT INFORMATION REPORT (20V-012)

This supplements Toyota's Amended Part 573 Report of March 4, 2020 concerning safety recall 20V-012.

Toyota has identified a clerical error that resulted in certain warranty reports from a specific production period being excluded from the chronology in the March 4, 2020 amendment. Additionally, as discussed with the Agency on April 2, 2020, Toyota has identified a separate clerical error that resulted in certain field reports from non-U.S. sources being included in the chronology in the March 4, 2020 amendment. Thus, Toyota is revising the relevant portion of Section 6, Chronology of Principal Events, in that document with the following information:

As of March 4, 2020, based on a diligent review of records, Toyota's best engineering judgment is that there are 73 Toyota Field Technical Reports and 3,358 warranty claims that have been received from U.S. sources that relate or may relate to the fuel pump failure investigated in this chronology and which were considered in the decision to submit this report.
