

Tools required:

1. Hot Glue Gun
2. Flat Screw Driver
3. Small Flat Screw Driver

1

Using a small flat screw driver, carefully pry out the center plug.

2

Plug removed.

3

Mechanism inside latch.

4

Using a flat screw driver, turn the mechanism all the way counter clockwise. Ensure latch is not locked.

5

Place a drop of hot glue in the middle of the mechanism to prevent it from rotating.

6

Mechanism filled with hot glue.

7

Reinstall plug and test latch operation.

8

Repeat steps 2-8 for second latch on door if equipped.
