For Immediate Release

Statement by American Honda Regarding Four Automobile Recalls

- **Approximately 608,000 total vehicles are affected in the United States**
- **Free recall repairs, varying by specific vehicle, include two software updates, replacement of rear view cameras and replacement of sliding door outer handle cables**
- **No reported crashes or injuries related to these actions**

TORRANCE, Calif. – Aug. 4, 2020 – American Honda will voluntarily recall approximately 608,000 model-year 2018-2020 Honda Odyssey, 2019-2020 Passport and 2019-2021 Pilot vehicles in the United States to complete one or more of four recall repairs, for free. There have been no reports of crashes or injuries related to these actions.

Honda is announcing these recalls to encourage each owner of an affected vehicle to take it to an authorized dealer as soon as they receive notification from Honda. Mailed notification to owners will begin in late-September 2020. Owners of these models can also determine if their specific vehicles are included in the recall by visiting www.recalls.honda.com or by calling (888) 234-2138.

Recall Summaries:

Gauge Control Module Software Recall:

2018-2020 Honda Odyssey

2019-2020 Honda Passport

2019-2021 Honda Pilot

Software that controls the speedometer display will be updated, for free, to prevent potential malfunctions, including temporary shutdown of the display. If the speedometer does not display properly, a driver may unknowingly exceed safe speeds, increasing the risk of a crash.

Front Control Box Software Recall:

2019-2020 Honda Odyssey

2019-2020 Honda Passport

2019-2021 Honda Pilot

Software that controls display of the rear view camera image will be updated, for free, to prevent potential malfunctions including delayed display of the rear view and display failure under certain circumstances when the reverse gear is selected. A delayed or absent rear view display may increase the risk of a crash.

Rear View Camera Replacement Recall:

2019-2020 Honda Odyssey

Rear view camera assemblies will be replaced with updated units, for free, to resolve durability issues that may distort the image or prevent display of the rear view when the reverse gear is selected. An absent rear view display may increase the risk of a crash.

Sliding Door Outer Handle Cable Recall:

2018-2020 Honda Odyssey

Updated sliding door outer handle cables will be installed in affected vehicles, for free. Water may enter the outer handles of the sliding doors and drip onto the cables connected to the door latch mechanisms. In freezing temperatures, ice may form on the cable, hindering proper cable movement and potentially preventing the door from latching. An unlatched sliding door could open while the vehicle is in motion, increasing the chance of injury to passengers.
