

MINI

November 2021

VIN:

Dear

I hope you're enjoying the innovative and exciting driving experience of your electrified MINI! We are thrilled that you have chosen to drive with us on the road to electrification.

I am writing to you today about a previous Safety Recall on your vehicle. In the Fall of 2020, you may have been informed that your vehicle was no longer affected by Safety Recall 20V-601. After extensive additional analysis, MINI has determined that certain modules in your vehicle will need to be replaced. As such, a Safety Recall has now been re-issued for your MINI. I'm sorry to have to relay this news to you. Please take note of the following steps:

First, as your safety is critically important to us, I want to let you know of the following information:

1. The vehicle should not be plugged in for charging. This could lead to a short-circuit and, in rare cases, a thermal event.
2. The vehicle can continue to be driven; however, it must be driven in hybrid mode only. Do not use sport mode or the shift paddles (if equipped) as this will charge the battery.

Next, while an In-Car Notification and official letter regarding this recall will be sent to you shortly, I wanted to address this matter with you directly and convey my sincere apologies. We have prioritized the repair of your vehicle, and the replacement parts are available now. This repair, as with all recalls, comes at no cost to you.

Lastly, we would like to offer you \$1000 as a goodwill gesture for your inconvenience, via Chase QuickPay or ISG check.
